Focus on double / triple dipping. Always go for sugar daddies long term relationships. Don't sell for lower than \$20 no matter what, if someones horny enough to pay \$20 then they're horny enough to pay \$50. If not, they will haggle their way down but most of the time they just accept it.

Not at all, I still use shite sources like KikFriendFinder and KikFriender and still made for example £358 (Almost 500) today alone. it's about you present yourself, if you seem fake they will know you're fake. If you do everything manually you will be seen as genuine.

I popped up to some girl at my Sixth form and told her to do a few pics for me and i'll pay her and that's it. easy, just be good at talking and tell them that you need it for a photoshoot project and that you can pay.

Edit; every nude image I send has no face in it and I come with an excuse for that so I just use a regular ewhore pack + the profile pic and verification of a girl I got it off. Works fairly well as long as u know how to se correctly

Don't ask why and most likely maybe the occasional one of these MAY pay but it's not worth the effort for the vast amount of timewasters

-People who message you saying anything sexual with their first message

-Profile pics contains abs

-Profile pic is clearly not them (except for people posing as younger adults who are clearly too hot to be on kik, those guys are desperate and willing to pay probably)

-Anyone under 18

-People asking to be slaves

-Kik registered age past 1000 days

Prolly about 50 other factors no exaggeration. My mentoring covers the advanced factors

When it comes to agc -> say are u sure its sent etc and push it till they send again and or say that its pending and it that u looked online it said itl take 24 hours to receive and u cant send anything unless u see it in ur email. Social engineer something among those lines, horny perverts usually wont wait 24 hrs and impulse send another one of the same. Advanced double dipping is also on my mentoring

How many people do you go through to earn said amount of money a day? Ermm not sure what you mean but usually 2-3 people pay me per day for a few hundred total
Do you ever send a "preview"? Never, only non nude fully clothed.
How long do you talk to people before they buy? 5-15 minutes, using copy paste scripts to general questions but realistic enough

Respond with Hey, after that 8/10 times they say how are you and I reply with copy pasted paragraph which I have in my notes smth among lines of 'Pretty bad tbh just tryna buy this laptop but im broke asf'. Advanced techniques taught during mentoring

Act like how a girl would actually act, don't send hella X's and 'hun' and shit like that. No genuine girl talks like that. Put urself in the mindset that a girl would genuinely have. Sorry abt grammar it takes the piss typing on a phone

It's quite advanced i'd only go into that during mentorship. Number one tip i'd say is to gain experience and trust your intuition, never ever give more than one preview image unless your completely sure they're going to pay.

Always respond to people whos first message is asking about the laptop such as people who ask 'Let me see the laptop' or 'How much is it' they are the ones who almsot always pay, variety of other ways to find out too

No need. Think about it realistically, whos goin to report someone theyre trying to buy nudes off. The police don't have time for that nonsense, only when it comes to blackmail etc do you need a vpn. Besides, if anyone actually went after you like the police then a Vpn wouldn't do shit regardless because almost every vpn keeps logs

As I said, I got my casual clothed pics off a real life friend. The nudes I used never show face, the only time they do is if the girl in the nude looks similar to the girl I post without nudes (who usually uses makeup, so I use the excuse that i'm not wearing makeup hence why I look different which usually works)

Waste of money to buy pics and shit, I use public packs no one can tell the difference as long as you know which pictures to choose. Timewasters are also easy to spot.

You don't need high quality traffic, you need high quality SE skills as well as the skills required to know whos a time waster and who pays. As I said, I reply to maybe 1/10th of the people who message me with a very high success rate

I'm doing this for you guys who need help making money so be appreciative and at least tell me what problems you're having so I can help

KingArthurBoss - September 27, 2018, 10:22 am

I have questions about payment options and one about installing the app on my android phone.

Payment questions

Should I only accept AGC?

And if I accept paypal, then I obviously cannot give them a link to my main paypal as that will alert the buyer to my real details.

So what do I do? I thought that creating a fake paypal doesn't work anymore because you need to provide identification such as social security number, address, etc?

And even if I somehow manage to make a fake paypal and start accepting payments to it. What's

the next step? Send it directly to my main paypal?

And finally, let's say I have a bunch of payments coming into the fake paypal. Wouldn't the account get frozen really fast and paypal would want identification before unfreezing?

Installing app on android

I also have another question about installing, I believe it was Kik 7.4 APK you mentioned? , on my android phone. What are the steps to install this? Should I just look up kik 7.4 APK in the google play store? Is it free? (I know I can check this myself, but my android phone is still in the box sealed, brand new)

Is Kik 7.4 APK the only app I need for android? Or is there other apps that I must download alongside kik 7.4 APK?

Finally, I want to conclude by saying thank you for taking the time to do this. It means a lot :)

Should I only accept AGC? Accept PayPal if you feel confident, I accept it because there is no way unless they hacked the PayPal (which I highly doubt) are they getting their money back. What will they say? They were paying for a girls nudes online? I've never had an issue with PayPal all the years i've been doing this

And if I accept paypal, then I obviously cannot give them a link to my main paypal as that will alert the buyer to my real details. I use a stealth PayPal then immediately transfer to my main PayPal via Gift

So what do I do? I thought that creating a fake paypal doesn't work anymore because you need to provide identification such as social security number, address, etc? No, don't know where you got that information from, all you need is an email.

And even if I somehow manage to make a fake paypal and start accepting payments to it. What's the next step? Send it directly to my main paypal? Yes, send it as a gift.

And finally, let's say I have a bunch of payments coming into the fake paypal. Wouldn't the account get frozen really fast and paypal would want identification before unfreezing? Once you create your stealth usually after a few payments they will reject your transactions but that is basic protocol for PayPal so just wait 24-48 hours before receiving any payments or sending any payments (make sure otherwise it will reset the system and you'll have to wait another 48 hours). The mistake people make is that they keep trying to send the payment again so it keeps resetting their system which is on a 48 hour reset each time a payment is made. You'll be able to send payment once 48 hours is over. (you won't be in any trouble, it's only because PayPal's system may detect slightly higher than usual risk but it's standard and happens to many people) Regardless, PayPal has bigger fish to fry and unless you're making tens of thousands they won't give a shit. They won't ask for identification unless your account gets manually limited, which only happens if you don't know what you're doing.

Installing app on android Go on google and make sure you don't have Kik installed, then manually search Kik 7.4 APK and once it's downloaded on your android then run the installation.

I also have another question about installing, I believe it was Kik 7.4 APK you mentioned? , on my android phone. What are the steps to install this? Should I just look up kik 7.4 APK in the google play store? Is it free? (I know I can check this myself, but my android phone is still in the box sealed, brand new) As I said go on Google, search Kik 7.4 APK and download it manually onto your phone then install.

Is Kik 7.4 APK the only app I need for android? Or is there other apps that I must download alongside kik 7.4 APK? Yes, Fake Camera on the Google Play store, that's the only other app you need.

Finally, I want to conclude by saying thank you for taking the time to do this. It means a lot :) Too many bullshit ebooks going around where they just teach the same shit and charge ridiculous amounts for it. Hopefully this can save a few people some money. You're welcome

Newb here please help, I am trying to download free packs on mega (on the mobile app) and I keep just being told when I hit download that it has started, but then when I try to open the file it just says "xyz file data" - nothing about download progress or anything. The forum posted a few hours ago everyone is thanking the guy for the free packs and I can't seem to get it working. For a different one I had the decryption key and that wasn't working for me either. The first one I mentioned doesn't seem to have an decryption key

I just started with snapchat, I was able to get hundreds of views in my story, but zero sells, I just offer "premium" for AGC, maybe that is not the right way to do this? or it was "bad luck". I get a lot of people telling me things like "Hey", but I am not really sure what to do, I chat with some but they just say stupid things. I started with snapchat and not kik because I am trying to avoid a lot the SE, but now I am not sure, looks like the semi autopilot I was planning is not working.
