A little of what ill be doing...

A lot of work will be put in on the website here's a little example of the work ill be doing;

- Keyword research on long-tailed keywords with less competition
- Edit the title, meta description, meta tags, headings, add image alt text, and tags, etc for every single page
- Making sure your website is mobile friendly with fast loading time
- Adding a sitemaps file and set you up on google webmaster to completely index your website. (If you haven't)
- Fixing any broken links
