Thread: [Im ready to buy a high quality crypt with binded file](#)

ShadeSoul - September 22, 2018, 5:20 am

Hello i am ready to buy a high quality crypt for my native rat and i want it binded with another file.
Let me know if you can help me out and crypt it to make it bypass windows defender & smart screen and all runtimes.
It needs to be FUD

PM ME

I was using rats and crypters last time 2016 and then all crypters were good it runed and worked but now ive buyed like 6 crypters and they are all detected on my other pc with windows defender runtime and smart screen

How can i sign it?

yea they stepped up their game big time these past few years. I believe you need a certificate but I've never done it so I don't know. Search for some of SilentWatch's posts on here. He's really knowledgeable in this area
