Thread: [\[2018\] Amp List + Scanning](#)

Slabs - September 22, 2018, 11:21 pm

Hello,

I was wondering if anyone could teach me how to scan for ldap/ntp/ssdp amp lists for my spoof servers.

Also looking for a supplier for AMP List's that are powerful and active!!

Is so really simple dude, you need scanner file and server scan. too easy lol

goldendagger123 - September 24, 2018, 6:43 am

Msg me, i will help you,.

DontWorryBeHappy - September 25, 2018, 12:31 pm

you'll need a scan server and quality scanners first
or you can just buy lists
ampnode.com/lists.html

You need a server which allows scanning to do this.

kylinweb - *October 31, 2018, 6:16 pm*

you need the server to scan, which is allow scan the amp list, then you need the script to scan, when you finish scan the list file, you need to filtering the file to make sure you have 100% working with you list :)
