I am offering a script which made me some nice money. Method is autopilot but it does require a little investment (\$30). I will be giving out a vouch copy to UB3R only.

Could you post at least winning/payment proof of the script?

I'd like to see proof too. Also what currency does the \$30 have to be? BTC or USD?

Review:

This is the exact same script as one I bought off another member 2 months ago. It's the exact script word for word and method for method. The member is reselling a product you can get for free and claiming has his own. The method works, yes, but you can find it in hundreds of sources online. He hasn't edited anything off it. I'll show proper evidence if needed.

thanks for the vouch copy!
