Thread: [Freebitco script - 24/7 vps friendly/payment proof!](#)

masterxy - September 24, 2018, 1:57 am

All the script does is ensure that the daily rolls are collected at regular intervals, as long as the captcha is not active. I earn that much with vps. You can run the vps for 24/7. To receive an affordable vps let me know, I can recommend you the best one for automation. Just let the vps do all the work for you.

I decided to make this script for public, because as a full time student I do not have enough time to handle all the traffic.

Here is the full script:

<https://pastebin.com/iUGz3u9v>

Still if you are looking for 1 on 1 consultation, send me 0.0012 or 5 usd btc to this address: 16vtABZcU7R88V4FSsPgUgeSszipKZiRjr.

After that leave me your transaction ID and skype details.

If you want to pay via paypal leave me a pm before a payment.

Thanks!

Here is the vps I am using (as cheap as 9\$ per month): <https://greencloudvps.com>

Update!

You can also try btc multiplier <https://faucetcollector.com> not sure if it's work with vps, testing now.

They accept crypto as well!

Here are some of my recent earnings:

Decided to move from blockchain to binance due to smaller fees.

If you need any help or further assistance do not hesitate to send me a pm.

Best regards,

Edit: OP shared the script with me. It's pretty basic but does the job, as long as you have some reward points in your account.

I doubt you can just "turn off" the captcha. It is there for a reason, so that bots like this would not exist.
