Alpha Private Crypters

After requests from many customers, AlphaProducts is now selling Private Crypters. They are coded from scratch, and sold to only ONE customer.

Buying a private crypter, you can be sure that your file will not get unFUD because of other users. You will be the only responsible of your FUD time.

Each crypter comes with a self ReFUD guide, to help you to keep fud as long as possible. I'm selling refud (stub recode from scratch) for \$20.

Alpha Private 1.1 - \$45

This crypter is coded in C# and is using .NET reflection.

It is simple, and only based on Fudding your file.

The interface is a command prompt, simple and easy to use.

It is compatible with .NET programs only.

Methods used in this crypter has never been used in a public Alpha stub.

100% FUD Guarantee

When you will get the stub, it will be FUD 0/23.

If it is not, you will get a full refund.

Package:

\$45 ONLY

- Command line Crypter
- Unique and private stub
- self Refud Guide
- 100% FUD

[AVAILABLE ON ALPHAPRODUCTS.ONLINE](#)

TOS:

- by "FUD", i mean getting a 0/23 detection rate on scanmybin.net
- I have not tested all programs, the only warranty you get is 100% compatible with RevengeRAT, LimeRAT, PlasmaRAT.
- I do not refund in ANY case

What about runtime scan ? as seems like most crypters bypass scans but don't bypass run time which makes it useless

Runtime scans can't be worst than the public stub (1/12, northon).
Tested on RevengeRAT on run4me.

Item sold, thanks to the buyer !
