Thread: [How do find dork from the target website](#)

Walkerz1356 - September 24, 2018, 10:59 am

How to find dorks from the target website to see its vulnerable or not? Do I need to try all the dork one by one? I use havij pro and sql dumper, but not work? Is there a dork scanner to only scan target website?

Not sure why your not using google for this and using the search term Insite:"dork criteria" url

Automated programs are more for mass searching for vulnerable parameters.

you need to use normal sql dorks which are available in google type sql dorks you will get and learn sql with manual way not havji and sql map so how you learn i m here and you can search in youtube also thanks

MonetizeMaster - September 29, 2018, 4:10 am

you can google "vulnerability scanner" for that
