Thread: [TWITCH Subscriber Bot | Generate Subs Instantly](#)

Biggy - September 25, 2018, 12:13 am

What is this?

This is a program that creates Twitch Primes accounts in the click of a button, and subscribes to the channel of your choice.

There is no limit on the amount of accounts you can create.

You can subscribe to yourself (to earn money), sell the accounts, or anything else you have in mind.

How do I get this?

Serious buyers only will be given a link to purchase. PM me.

This will not be a public thing, as we don't want this to be patched.

Only 10 people will be given access, after that, sales will stop.

Price:

200\$

T.O.S (READ!):

1. Obviously, no trying to crack the program.
2. We are not responsible for any Twitch bans.
3. We are NOT responsible if this goes down, or the method gets patched. This one is a no brainer, not everything in life lasts forever. If Twitch somehow shuts us down, don't expect to be refunded or given some kind of leniency. Use the program, make your money and profit. We can not predict the future. This will last as long as Twitch let's us last. If you aren't comfortable with that, DON'T PURCHASE!

yo I pmed you about this just wanted to verify something.

Galaxias - September 25, 2018, 12:39 am

Are you willing to provide any images or videos of this being in the works? Also are you considering a discounted price for a first buyer?

Sure, privately though.

Someone already purchased as well, user named Criminal. I guess we can wait for his review.

Everyone beware, he's selling stolen work. MrEllie, which Biggie is proxy selling for, is not a dev. So if Twitch pushes even the slightest fix, he won't be able to fix it and therefore, exit scamming everyone. Thanks everyone for reading. Me and Ellie have been in contact for ages.

TwitchHelper is not the sub bot program. It's a viewbot. Either way, people can say whatever they want. I was told the program was purchased and there's no physical evidence it was cracked besides words in a screenshot.

?Criminal - September 25, 2018, 1:05 am

Vouch for my man biggy here testing it out and it's working flawlessly, I also like how it uses HWID to prevent saturation and leaking. As long as it's kept low profile I doubt it will be patched.

Well yes, I'm kind of the "king" of twitch bots here so Ellie always contacted me on discord about partnering with him and his failed business.

My point is... regardless of what he said, how do you know he didn't actually buy it? Besides trying to sound cool for cracking it.

Anyway, this isn't really the place to discuss this, and it's odd that you're doing this with a competing product. Just move on and sell your product and I'll host this sales thread. No need for more arguments like the last 2 community alerts.

What you have is irrelevant to anything, just like your life on this Earth. Stop typing in my threads. You have no real hard evidence of anyone cracking anything so just stop.

Hi King ?

An easy way to find out if it's cracked is to just ask for video/screenshot proof. If it's cracked then it will be similar to the original UI and feature wise since I doubt any effort was put towards rewriting and improving it. If it's not cracked, then I see no reason to not promote the product in the thread with screenshots and such.

The cracked and leaked source has been on sale in multiple forums with just title and background colour of the TH source changed. The excuse of "he purchased" and is now suddenly reselling it without any license locks from the exit scammer dev and UI being different color/title is a bit worrisome.

Resellers everywhere, easy money I guess.

I didn't crack anything sir, he did. Is your brain functioning? You're selling cracked programs that aren't yours or Ellie's.

You're just a proxy seller, I'm sorry MrEllie has convinced you into working for him, so you're pretty much innocent.

But beware of MrEllie, he likes to manipulate people even it means cracking people's programs and re-selling them.

Could've sworn views.run was king :thinking:

Anyway, sup Bus, the source was bought from the exit scammer kid for a few hundred. Elie just loves to brag and seem cool for "cracking it".

I never said you cracked anything. I said where's the proof that HE wasn't just trying to sound cool by cracking it? No one has any actual hard evidence besides some discord screenshots, which isn't even viable proof on HF.

Yeh he's king of Web, we're king of software. But anyway, point still stands. MrElie has no coding knowledge so the product you're selling will backfire on you.

So who is managing the file with the HWID's stored? THelper, Elie or yourself? Kinda terrible if someone was to just revoke access to the program.

THelper has no involvement in anything anymore. Honestly, we have no idea why he exit scammed. All his products were working perfectly and he was making money. However, no ones HWID will be revoked aslong as they don't break the small TOS we have. Like I said, it's eayy to make your money back and then profit. Within 1 day you can make it all back.

I'm simply asking for a screenshot of the tool. If you're selling a cracked program, users should know.

@Biggy: I've deleted more than a few posts from this thread today and have seen even more reported posts. Some of them, like the user above me is asking a valid question and is not sales trashing.

Instead of reporting every post, why not prove them wrong and be done with it?

For anyone posting on this thread from this point forward, think twice before you do. If you go off topic or start trashing your post will be deleted and a warning will be issued, followed by a ban if you continue.

I've already told them, MrElie bought access to the exact program they are referring to. It's not cracked, it's purchased. They keep asking and insinuating that it was cracked. I've explained it.

Nonetheless, the people that keep posting are all in the same discord group, and have threatened to keep posting simply because they dislike me.

The only things screenshots will show of the program is just a redesigned version of the one that was purchased.

So he purchased the software from a person who exit scammed people out of \$5k+? But he's telling everyone he cracked it?

If he cracked it he shouldn't be selling it.

I'll tell you right now he didn't purchase it. I was Twitch Helper's partner and managed sales; Twitch Helper disappeared instantly BECAUSE MrElie cracked his program. I had full conversations with Twitch Helper and he did NOT sell anything to MrElie. I can prove that if you want as well.

Someone is lying here and I think you need to figure these facts out before you continue selling, not only for the safety of your customers but for your reputation as well.

In that case it should be fairly easy to prove you are in the right. Show proof of the purchase and they will all be silenced.

As for the threats of people continuing to post here, if proof is of the purchase is shown, staff will take care of anyone posting things regarding the MR.El原因 connection or you having cracked

I've received proof, however it does contain the edit scammer (TwitchHelper)s full name and email address, so I don't want to post it and get banned. Do you mind if I PM it to you and you post on behalf of it, so the accusations stop? You can also verify the email with his Hf account if necessary.

That's a stealth paypal, none of the info is real. Either way I understand sending it to staff first
