Thread: [Is this a permission type issue?](#)

Carl Elias - September 25, 2018, 4:22 am

I noticed this about a week or two ago I think, but I just thought it was the user had PM's turned off. IT seems like any of the users in the R3KT group, do not have the PM button on their post.

Here are two users I looked at

<https://hackforums.net/member.php?action=profile&uid=93419>

<https://hackforums.net/member.php?action=profile&uid=633823>

Their post:

[RE: Why Mostly Developer use mac ?](#)

[RE: REPUTATION FOR ALL!!!! | GET REPS FOR POSTING HERE! |](#)

Is this expected behavior? I can still PM them from their profile (and for the one user, there is an option to email)

That's actually really interesting! :O Good find. Let's find out what people say/think.

Nuworld - September 25, 2018, 7:19 pm

UM? Good catch OP.

It seems as though the R3KT group is missing the 'Quick PM' option from posts.

Non R3KT user indeed have this option within posts.

I'm sure this is just a over site/bug and Omni and or Xerotic will take care of this shortly.

Omniscient - September 25, 2018, 11:07 pm

This is a MyBB bug probably from their display group.

EDIT: I made a change. Do you see it now?

Yep I can see it.

Now this bug is fixed

Yeah it is there now it seems. Figured it was a bug.

Thanks for the quick fix

I think this is also an issue for users who set 3PIC as their display group as well.

Based off that I wonder if it's related to Omni closing groups
