Thread: [Lagg with good ping and fps in online](#)

Shoppa - September 25, 2018, 10:11 am

This is bothering me so much now, I checked my internet speed and it's good

Ping 9 ms
Download 40,7 Mbps
Upload 4,1 Mbps
Always stable 60 fps

My router is around 5 meters next to me without walls and I use cable internet.

This issue is in online gaming (rocket league), the game runs smooth but I notice other people missing the ball but hitting them in reality and i'm missing very often when it should be a hit, also when I check the replay different things happened than on my screen.

Any ideas what it could be?

Are you sure you have 9 ping? I assume that is a speed test, and not an actual test to whatever rocket league server you're connecting to.

Directly connected or wifi?

OrdyHD - December 16, 2018, 9:08 pm

there are a difference between your ping test "ping your close server" and the server game

it only happen in most of cases because of server issue .
