Do they really work, could i profit 3k in days if i invest \$500 or is it all sales talk?

Yes i could afford to see \$500 burn in worst case but it would hurt my bitcoin savings.

Not a fan of those scripts, tried with free one in the past, but that one looks legit.

How much % chance do you think i have seeing those BTC burn away with that script?

It's all about luck, and in the end you will lose everything you placed in there.

I'm sorry but that's how it is with bitcoin betting scripts.

If there was a magic script that would make you win all the time, the betting sites would shut down, trust me, THE HOUSE ALWAYS WIN.

It is good fun playing tho, just be prepared to lose it all. :)

You confirmed what I was afraid for, thanks!

You can easily profit 3k in 5 days using scripts with 500\$ bankroll

You just need to use a proper bank management

So with an initial 5k investment I could easily profit 30k in 5 days?

Correct. You just have to use them smart. I've used them hundreds of time and I know how they work so I am making steady profits daily

I've decided to stay away from btc scripts and gambling in general.
