New File Hosting Site, Allows upto 10GB upload!

filecupid.com

Upload, share and manage your files for free.

As Per DMCA/EUCD, files will only be taken down,

if owner of the files provide that the material is actually copyright protected or trademark infringement.

If no legal documents are provided, such files will not be removed as per DMCA/EUCD.

Hacking tools, PDF's, .exe, all is allowed to be uploaded.

Share videos & Movies aswell!

- Josh

I am really digging the site design, and everything feels nice.

Might check the service out in the future, I just want to make sure it is here to stay.

Nice work! :)

Thank You, please let me know any suggestions you might have

Underd?g - September 29, 2018, 6:59 am

Site actually looks pretty decent, a bit light if I must say so but other than than, looks and works greats.

Good Job.

Super - September 29, 2018, 9:10 pm

What are you using for backend storage? An S3 bucket? AWS Glacier?

Good Job.

Thank you for the feedback, going to do some tweaking this week as i agree it's not very accessible at the moment!

Just bare metal servers! ?

Jarymaine - *October 3, 2018, 1:53 pm*

Thanks for sharing this! Cool!

joshleroux - *October 22, 2018, 4:30 am*

please provide us more feedback! We would love to make it better!

James Burnham - *October 28, 2018, 9:33 pm*

Sharing this in HF is a bad idea because people will upload malware and your domain will get blacklisted from google.

TheGoldenRelik - *October 29, 2018, 3:38 am*

For some reason the page is so bright so it's difficult to understand the differences between the pictures.

Props for the filesize though
