Thread: [Scammed By BlueShark™ 284\\$ \(UID: 1066842\)](#)

**Maxibrainz10** - September 27, 2018, 4:59 pm

Before purchase i asked him if i was gonna experience data loss or VPS shutdown as seen here [prntscr.com/kzlhqg](#)

But he promised me i would not loose a single file as seen here also [prntscr.com/kzli33](#)

After payment i didnt use it. Wrote them to shut it down for a while since my money was wasting but i was told the billing could not stop or pause. I used VPS for 2 days hosting a Loki Botnet and it went down under 48 hours. I opened a ticket about 3 weeks now. No FIX from my VPS, my 269 USD gone.

Now i could not wait, i went ahead and purchased a small shared plan for 15 usd while they work on my VPS which they have been working on for 3 good weeks. Giving me a shared hosting with no GMP extension, so botnet could not work. I wrote them and they took down the shared host without replacing. Its been 6 days now, been writing them on chat support and opening ticket everyday. He's skype comes online and away but the scammer will not reply. My DATA all lost, my MONEY all lost.

Out of being desperate i bought a vps for 3 usd per month from hostmaze. Been using my loki on it for 5 days now, it has not gone down. But i buy a server for 269 usd and it goes down under 48 hours. This dude is a pure SCAMMER. Fake pretense...

Contract?

Can see this being closed....

This^

You should have dealt with him with a contract and onsite.

Unfortunately your dispute is invalid.

**PerfectStorm** - September 28, 2018, 1:14 am

God would you guys read the dispute tutorial its literally the first thing you will see

**Infinitum** - September 28, 2018, 1:20 am

Did you spread malware through said vps or only used it to monitor your activities? If it is the first, they have the right to terminate your service as per their ToS.

If not, ignore me.

No contract no dispute

**Vitani** - September 28, 2018, 7:22 am

Since you did not use Contracts, this deal dispute is considered invalid. Thread closed.
