Information:

BTC Launder is a fully custom script with a unique laundering method that will guarantee no trace of the bitcoin to it's users/customers. The script allows for any person to use the platform and set a receiving wallet and launder their bitcoins to the desired wallet with a clean trace.

The technology behind this powerful script can amaze you since most methods are not out there for developers to learn.

Super lightweight script with no traceable resources, no databases, no logs and the best of all is that it's users can be safe using this service.

Packages:

\$200 - Fully Working script without custom fee configuration for the website administrator.

\$850 - Fully working script with custom fee configuration for the website owner that allows them to get % for every laundered money (In discount for the first month of sale)

Upgrade:

- You will be able to upgrade if you bought the first package of 500 USD any time.

Custom:

Custom requests are subject to price adjustments.

All things like custom template apart from the original of the script template, custom functions, custom design.. can be categorized as custom requests.

No, your money will be never lost using this script as the owner will have no control in the launder process.
