(Oct 5, 2018 03:54 AM)Nadisty Wrote: [\[CITE\]](#) I don't know OP or have never spoken too him before but his communication is good and talks to you very professional. Whilst talking professionally, he doesn't seem to make you think you're his client, more like a friend. I've been given pretty clear instructions on how to properly advertise my page. It's all been laid out professionally even with free graphics included (for the ad) which I think is a bonus. The image he made for me looks professional as well and pretty confident it will draw a lot of my audience in alone.

OP has laid everything out simple for a beginner like me who has barely any knowledge in advertisement. One of the first questions was "Whats the goal" and I proceeded to tell him. I didn't need to ask any questions because the information he's given me is straight forward.

Apart from a few capital letters where there isn't meant to be (maybe OP isn't native English etc) theres honestly not really a lot I could pick at. In the ad description the punctuation is perfect, maybe he was just rushing.

His response times were fantastic, if anything he was waiting for me to reply!

He offers a great service and wouldn't hesitate to deal with.

I will update this review in a few weeks with stats of my advertisement.

Cause I've been working on marketing and Facebook Ads for years now. Also, for \$30 you get full custom design made for your ad, copywriting (if you have product) and research of the market. Anyways, if you're here to waste my time, please move on to your next victim.

I wrote above, 2 trials. I'll do FREE custom ads for 2 HQ members and let them share a review.

The fact that you looked back to this thread and took the time to reply tells me you won't do that, which makes me feel better that not every vouch asker is a freeloader!

I am really interested in this, please do let us know how it is!

Hey Nadisty,

Thank you for this amazing review and it was a pleasure working with you! And yea about that capital letters, I made it on purpose. Capital letters attract the eye so it is acceptable to use them in advertisements. There are also some researches about that, it's shown by the results that Ads with

capital letters in headline get better conversions than those with no capital letters. So I just recommend using it :)

Once again, thanks!

I can guarantee traffic but if your website/store/blog looks like crap and you're selling or offering something nobody likes, I can't help you there.

Advertising is not fixed. You can't say, "Oh I'll give \$20 now and that will bring me 1000 new visitors", it doesn't work like that.

I brought private method from Morningstar and he was selling graphic service in it.
