Alpha Private Crypters

After requests from many customers, AlphaProducts is now selling Private Crypters. They are coded from scratch, and sold to only ONE customer.

Buying a private crypter, you can be sure that your file will not get unFUD because of other users. You will be the only responsible of your FUD time. Each crypter comes with a self ReFUD guide, to help you to keep fud as long as possible. I'm selling refud (stub recode from scratch) for \$20.

Alpha Private 04 - \$65

This crypter is coded in C# and is using .NET reflection. It is powerfull, and uses complex methods to create a shield to your process, without any external file drop. Your file can't get killed / uninstalled by any way ! Anti crash / Botkill / Removal ! Both file and process are protected. The interface is a GUI, simple and easy to use. It is compatible with .NET programs only.

Methods used in this crypter has never been used in a public Alpha stub.

100% FUD Guarantee

When you will get the stub, it will be FUD 0/23. If it is not, you will get a full refund.

Runtime?

Do you have any test copy?

casperr - September 28, 2018, 8:49 am

i would buy this if it was working on native program ://

Runtime 1/12 tested on RevengeRAT.

Wtf, test copy on a fully private crypter ????

I'm releasing only one copy to only one customer. No more.

Alpha Private 5 should be oriented native.

Sorry about that :/

Item sold, thread closed.

Thanks to the buyer !
