Thread: [3p1c Being Removed](#)

Omniscient - September 28, 2018, 3:26 pm

I'm going to do with 3p1c what I did with Ub3r and remove it from the upgrade options.

The group will remain in users profiles but it will no longer be purchasable. I'm doing this to simplify the upgrade options available to new members hoping they'll be less confused by the choices they face. Some of the features that are part of 3p1c will be moved into either r00t or L33t.

I plan on doing this in 1-3 weeks. So this could be your last chance to grab the group if you're interested. But I must say if you're r00t then likely you won't need 3p1c.

Please note, if you have 3p1c you will not lose the existing features you have or the userbar.

Thank you.

iNuke - September 28, 2018, 3:29 pm

I think I will take it within that timeline to support the forum.

Thanks for the news!

Sigma - September 28, 2018, 3:31 pm

Yeah, r00t and 3p1c were pretty similar. I believe it should help new members decide what they like better.

Will you replace it with a new cheap upgrade or is that no on the to-do list?

Kumara - September 28, 2018, 3:35 pm

I went ahead and purchased 3p1c.

Why not support Omni? <3

Ez.

I doubt they will add a new upgrade, since he did mention the features of 3p1c will be merged into either r00t or l33t, and also so new members don't get confused when trying to upgrade their accounts.

PerfectStorm - September 28, 2018, 3:47 pm

I am glad we keep the usergroup still in profile. Thank you for the update.

Omniscient - September 28, 2018, 3:56 pm

Quote: Will you replace it with a new cheap upgrade or is that no on the to-do list?

It will not be replaced with a cheaper group. If anything group prices will increase.

I think a simple 2 tier upgrade system is more than enough. Likely a new member won't even see the r00t upgrade option until they are actually in the l33t group.

With 3p1c and Ub3r removed it's only a matter of time before I get rid of l33t too. :) Won't that be something.

Banter - September 28, 2018, 4:16 pm

i think that's a good choice, from what i have noticed anyways a lot of members on their first upgrade get l33t anyways, i got l33t firstly then r00t but i bought 3p1c just to have it, good choice on removing it tho.

Replaced with pow3r or has that name gone down the drain. Would be quite interesting to see different colors on the member list.

there's a good chance if he does get rid of l33t and replace it with a new, it will keep the same color as l33t, i remember reading a post omni made one time before r00t went live saying how he hates having too many different group colors on the forum. But who knows, r00t ended up getting a different color than the other groups anyways, one idea was to keep it the same color as ub3r, but that didn't exactly happen.

Omniscient - September 28, 2018, 5:14 pm

Meh, just removed it already from the upgrade page.

UpTheCrust - September 28, 2018, 5:28 pm

Smart move, the fact that it wasn't part of the l33t to ub3r (and later l33t to r00t) upgrade flow seemed to confuse a lot of newer members. I think there's enough excitement on the forum anyway that a lot of people will want to go all the way to r00t regardless

s1nister - September 28, 2018, 5:36 pm

I guess it's a nice decision as it was a bit confusing to decide among them,
Though I was planning to arrange for 3pic, looks like I'll have to upgrade to l33t only ?
So, will the price for l33t change ? I mean are you going to make it costlier or cheaper?

"Rare". ???

Good choice, all the different possibilities and especially the long feature lists probably confused some new members. This should be way easier if they only have one choice of upgrading.

He just said few posts earlier he's maybe going to make the available options more expensive.

It's likely going to remain at \$25 for now.

Indeed. I noticed a lot of members confused about whether to choose L33T or 3P1C as their first upgrade, and then getting disappointed when they realize 3P1C didn't have all the features they were wanting after upgrading. This should make things much easier and less confusing. Plus 3P1C was kinda cheaply priced compared to the other upgrades when it was first released, so instead of saving up and getting L33T a lot of members were simply settling for 3P1C.

I support this decision for sure, it'll encourage members to be more active to qualify for R00T instead

More or less a good explanation why I have removed it. I'll spend some time next week moving the features of 3p1c around.

Almonds - September 28, 2018, 6:04 pm

Was a good idea to buy it a few months back before the price increase.

I did so then, not sure if the price increase as happened though.

Good innovations, I agree with keeping things nice and clean- simple.

I just remember buying l33t then moving to ub3r so it wasn't really that complicated. If I were to do things now I'd pretty much be lost. Although it does explain on the upgrades page what features you get and what you don't get.

Good decision. It was a good Rank but was a confusing one as well.

mrnapolean1 - September 29, 2018, 4:18 pm

I think this is a good decision. HF 3p1c was a group created some time ago and was purchasable with the now defunct OMC (Omnicoins) crypto. But seeing how similar the group is to r00t, HF 3p1c was a bit confusing to new member that wanted to upgrade.

But for those that want the userbar better jump in before its gone. - Looks like the upgrade option has been removed from upgrade.php.

This is a little off topic but, just a question

Does ub3r get all the stuff Root has? And even if more implentations are added into Root, do people in the ub3r usergroup sill obtain it?

Because depending on some of the features you plan to release, I would be interested in geting root, but it still denys me to upgrade.

Do I have to PM you to get root approval like how I did with the ub3r process?

Sorry, I've been on and off this forum for awhile now.

Ub3r and r00t are almost identical. One difference is that r00t can make lotteries whereas Ub3r members cannot. Future features that r00t obtain are not guaranteed to also go to the Ub3r group. Ub3rs are NOT able to obtain r00t at all.

Seems like any new permissions that r00t gets should definitely be added to Ub3r. We simply upgraded before them, why does that mean we should potentially lose out on features?

Omni has stated multiple times in multiple threads Ub3r will never be able to upgrade to r00t.

In fact there very well could be a time Ub3r are deleted/Closed all together. Per Omni.

And here we go again with the Ub3r feeling they are in titled/special?

Every time this subject/posts comes up we as Ub3r loss permissions.

The last time some complained about this (Ub3r should have) we lost the ability to view ban reasons.

Plus those that complained got there accounts closed, No joke!

Keep complaining and the next thing you know were going to wake up one day only to see we are just a new member at the bottom.

Everyone should keep up to date in the News and the RANF section.

There is some good information there.

I don't think I was complaining or think that I'm entitled.

I understand I'll never get r00t, that's fine, I don't care. It's basically Ub3r without the approval. They only extra permission they have is creating a lottery, something I don't really care about. If anything, I like being an Ub3r more anyway. I just think if they're going to start adding more permissions to r00t, I feel like they should be added to Ub3r as well. That's not being entitled, that's just simply wanting something to be equal.
