Thread: [Injection not verified - Shellter](#)

NightFury1224 - September 28, 2018, 4:57 pm

Hello All

So i'm a rookie and i've been trying to inject payload in EXE file using Shellter ..
every steps goes fine until this last step
it say :

Injection: Not verified!
Something went wrong during the verification stage.
Please Report To Author.
Last_Error_Code: 5 || Access denied.
RET_CODE: -7

what should i do guys ?

First step would probably be to run strace on the process maybe you can gleam more and follow the tutorial

<https://null-byte.wonderhowto.com/how-to/hack-like-pro-evade-av-software-with-shellter-0168504/>

make it simple keep it simple less issues then get more complex.. what version of shellter is this?

NightFury1224 - September 28, 2018, 9:12 pm

thanks for the reply .. actually i found a tutorial on youtube .. i followed all the instructions right , still not the same results ... i'm using shellter 7.1 latest version i believe , also latest version of Kali , installed on vmware workstation pro 14 ...
