Thread: [I'm looking for earbuds...](#)

I listen to music mainly through earbuds. I want to know if you know any earbuds on the market that great quality and price.

For their price, Apple Earpods are the best you can get (I've tried pretty much everything else in the price range).

If you're looking to spend, buy a pair of Bose.

No they aren't, don't buy Apple's overpriced shit.

They have a lot of bass, if you took the effort to look at the link you will see that it is one of the features of the earbuds.
