Thread: [Facebook Audience network SDK](#)

**AsphaltM** - October 1, 2018, 1:54 am

I would like to know if there is any opportunity to know how to decrypt payload data, which Facebook Audience network SDK generates while creating request and sends to server. I have already know that it uses SHA-1 algorithm to encrypt data as HashMap parrams and now I want to find out if there is a way to look at encrypted parrams.

Part of JSON looks like this

Code payload:

```
