Thread: [The Ultimate Dox Tool](#)

**?Criminal** - October 1, 2018, 9:07 pm

I had a friend who quit but before he did he made custom maltego transforms that utilized apis from weleak, snusbase, RECAP(better version of pacer for court documents), whitepages, spokeo, carfacts api, locationsmart api, skype resolve apis etc it had so many apis and even in it's current state it was powerful af and it wasn't even close to finished, hopefully someone can create something like that again and maybe make it into a product, theres so many ideas that can be utilized in a dox tool to make one powerful investigation framework that can quite literally find almost anyone and possibly rival NSA"s xkeyscore tool, like when he was testing it for a spin he was doxing people left and right with the click of a button.

**Vampiire** - November 6, 2018, 11:13 pm

I have a framework called skynet pm for more info not posting on here.

**ProfitableFlip** - November 7, 2018, 5:34 pm

I think ill make something like this and probably sell the bot or something. Seems very interesting.

**vagabond** - November 7, 2018, 5:41 pm

why would u want to rival xkeyscore? just use it urself
