Thread: [Lost auth](#)

Ash_tempt - October 2, 2018, 4:20 am

tried contacting u guys with contact form for months and had other HF members pm admins inquiring on what i can do to get this resolved, and haven't gotten a response.

my winauth didn't import all of my saved auths on it so i lost my HF one along with a few others so when i cleared my browser cookies cache etc it logged me out of HF and unfortunately i didn't notice this issue until trying to log back in and not being able to provide my auth obviously i cannot log back into my account, i've sent emails etc as stated before with proof of it being my acc/ asked if anything else was required.

my profile is :uid=1865979

happy 2 provide anyone of relevance with any proof they need.

best of luck with your account men

Business - October 2, 2018, 5:37 am

You're probably out of luck man. Due to a recent site policy change, account recovery is no longer supported.

fuck i hope not as i've been trying since the 6th..

Omniscient - October 2, 2018, 1:08 pm

Too late. No more assistance with recovery.

Updated Help Doc too.

?action=help&hid=17

i've been trying for months before though, i didn't want to pester you guys with making a thread, but after 4 months i was basically forced too i've been on HF for years and it's a huge part of my life, considering my recovery was well before the update could it please be reviewed.

PerfectStorm - October 2, 2018, 6:02 pm

Well that is a bummer good luck with this.

It seems as though the discussion has been made.

Hack Forums is changing daily as with the rules.

It's your responsibility to secure your account.

Your first problem was using "winauth" you should have been using Authy.

ht

can you give this a review omni since i had sent recovery requests months prior

i used both, i mistakenly used the first one and was correct by my mate and used the second twice which is why i was pretty adamant i had used that form cause i remember using the incorrect one originally
