Thread: [IOS coder to make an e-commer app developer/cce app.](#)

Money Man - October 2, 2018, 10:11 pm

Got a friend who needs an app done for his marketing company for his clients.

If you are QUALIFIED and PROFESSIONAL contact me and I will make it worth your while. Feel free to check through my recent threads and market reputation.

I only use 100% MM and will cover the fees. I am fine putting the whole amount agreed upon towards the MM right off the bat (If I have faith in you, I am not going to do this otherwise since BTC value can drop and I am held accountable)

When you contact me I need to know the following;

What CMS systems have you used...Wordpress, episerver, sitecore, etc. Preferably some past work will be nice.

I had my buddy who needed this done do everything through buildfire and I have screenshots I can send to people interested.

?

Hired for 6k\$ on site with Escrow.

Thanks to anyone who PM'd me.

LeetHost - October 6, 2018, 1:11 am

If you anymore projects like this or needs a developer for same, let me know at Skype id leethost

I'll share our company's profile and can use MiddleMan.
