Thread: [Selling 2 250\\$ USD HP Coupon Codes \(Only works in USA\)](#)

N?ght - October 3, 2018, 2:28 pm

This only works on the HP.com store.

I had an issue with HP and they credited me \$\$\$, I am also Canadian and they gave me codes that only work on the US store. I can easily get it changed but Ive been complaining to them for weeks and prefer cash anyway

Looking for 150\$ usd per code

Since this is a big big easy item to scam (on both sides) I will be using middleman minamalist and advise you to purchase the item right away so nothing goes wrong on any side of the party. I will provide as much proof as I can to minamalist that I didnt use it, but if you are ready to be legit and not fucking scam then there will be no problem whatsoever.

Im only giving this to trusted members cant deal with the headache

HP sells a fuckton of things, from speakers to bose headsets and nice ass printers so dont just think its computers

Heres an example of what you can get
