Thread: [Fortnite HWID Unban Methods.](#)

psychedelics - October 4, 2018, 3:30 am

Hello, Hackforums

I've got a way to bypass the HWID ban. Without buying an HD, or another computer.

First method:

Turn off the computer, and remove the cables.

Remove the SATA cable from your HDD and motherboard

Put another SATA cable, usually 2 or more in the box of your motherboard.

And change your position. Example is on SATA 1 switch to SATA 2.

Second method:

Turn off the computer, and remove the cables.

Remove the battery from your motherboard.

And put it on again.

Reminiscing: This was resetting your BIOS.

Third method:

Reverse the memory position of your motherboard.

I did all these methods, and they all worked.

Do it all at once.

Reminiscing: I do not know if it works on new bans.

I recommend reinstalling Windows.

ANOTHER METHOD USED!!

Step 1. Format any and all hard drives in PC when ban happened and fresh reinstall windows, does not matter which drive. R

Step 2. Download and run TMAC to change MAC address on wifi and ethernet.

Step 3. Hard reset modem and check to see if ext. IP has changed, if it has you are good to go, if not you will need to research your ISP to find how to change, sometimes it takes 7 days for your ISP to assign you a new IP address.

Step 4. (This is the important one, this may or may not work without the previous steps, worth trying before resetting PC)

If you have 2 or more HDDs installed, change the order in which they are plugged into MB (I.E if HDD1 is in SATA1 and HDD2 in SATA2, swap them so HDD1 is in SATA2 and HDD2 in SATA1) then add an extra SATA cable to mobo and hide somewhere)

Step 5. Change order of RAM in mobo (may or may not be necessary)

METHOD 3!!!!

So a lot of you seems to be stuck by the Ban Hammer unfortunately and the sad news is that there's no way around except reinstalling Windows, But we all know that it's the last thing one would want to do,

Fear Not! In this post i'll be guiding you on how to Bypass Fortnite Ban ANY Number of times! Without doing anything to your windows!

Note: Even if you are not yet banned, i recommend you using this because IF IN CASE you get banned, your main Fortnite on your main system is still ban free and safe

Requirements:

- Windows 8.1 ISO
- Min 32GB Pendrive
- Time

Idea:

You'll be installing Windows on a USB, install Nvidia drivers, and Run the game without any KICK, if you get banned again, Reinstall windows on that same USB. ez pz

Note: You don't need to redownload Fortnite.

STEP 1 - Clean up traces

Delete the following Registry:

Code:

HKEY_CURRENT_USER\Software\Epic Games

Delete these Folders

C:\ProgramData\Epic

C:\Users\YOUR NAME\AppData\Local\FortniteGame

C:\Users\YOUR NAME\AppData\Local\EpicGamesLauncher

C:\Users\YOUR NAME\AppData\Local\UnrealEngine

C:\Users\YOUR NAME\AppData\Local\UnrealEngineLauncher

NOTE: NO NEED TO UNINSTALL FORTNITE / EPIC GAMES LAUNCHER

STEP 2 - Get the tools

1. Download WinToUSB
2. Grab a 32GB USB

3. Download Windows 8 ISO file (google)
4. Download Nvidia Driver for your GPU
5. Download Any additional Drivers (wireless card) [optional if you have ethernet cable]
6. Download Directx 9 OFFLINE SETUP (93 MB)

STEP 3 - Install Windows on USB

Note: You'll lose all data on USB

1. Install WinToUSB

Select the ISO file:

This image has been resized. Click this bar to view the full image.

3. Select 1st option (MBR only)
4. Install

[Wait now, it may take upto 2 hours to install]

STEP 3 - Boot From Your Portable Drive

1. Self explanatory (or google, how to boot from USB for your laptop model)

Now windows will Install apps and configure itself.

STEP 4 - Inside Windows

Open file explorer , if you don't see your main system drive, then do the steps below

If you see your system drive, Follow below

1. Navigate to Directx installer
2. Install DirectX
3. Install Nvidia driver now
4. Install other drivers you need.
5. Connect to internet (plug ethernet cable)
6. Go to Your EPIC games folder (ITS NOT IN YOUR C: DRIVE NOW, check other drive)
7. Start Epic games launcher

8. Make a new account.

9. Now download(or verify preinstalled) fortnite [DON'T INSTALL ON C DRIVE]

10. Now Start the game!

You won't be kicked after jumping from Bus anymore!

STEP 5 - Further Steps

1. whenever you want to play the game, just boot from USB

2. This preserves and does no harm to any of your main system files.

Q: I got banned again!!

Go to Windows settings, Reinstall Windows,

This will delete your files in USB ONLY, so you'll have everything on your main drive.

Just follow the tutorial again!

I hope this helps!

Let me know if you tried it!

I forgot to mention that it is recommended that you change your I.P too (ONLY needed if you are IP Banned)_____

Vouch for this working method!

Babaghanough88 - November 21, 2018, 1:10 am

So purchasing a New SSD and getting rid of the other ones wont fix this?

savior1 - November 22, 2018, 9:54 am

thanks, hope still works.

no\$fer7u - November 22, 2018, 10:49 pm

Jesus why go thru all of this when you can just play legit on fortnite lol

psychedelics - November 27, 2018, 6:31 pm

Reinstalling on a new SSD or swapping the HDD / SSD that you were banned on should fix the problem after reinstalling windows etc on the new drive.

it will because the ban is based on ur SSD or HDD ID

(Nov 22, 2018 11:49 PM)mael Wrote: [\[CITE\]](#) Jesus why go thru all of this when you can just play legit on fortnite lol
many people have been falsely banned and epic games support gives no fucks.

(Nov 22, 2018 10:54 AM)savior1 Wrote: [\[CITE\]](#) thanks, hope still works.
Confirmed Still Work 11/29/2018

Babaghanough88 - December 2, 2018, 6:52 pm

Bought a new SSD and switched ram up got unbanned perfectly fine

Good to know! Many different methods work for the HWID Unban! Enjoy!

Benji - December 6, 2018, 4:05 pm

Just tried this. Works great. Thanks!

Darklighted - December 31, 2018, 8:44 pm

Does method one alone work? Let me know what you guys did

Hack - January 2, 2019, 4:05 pm

Ill give this a go when i'm HWID banned, thanks.

Hetepheres - January 5, 2019, 4:41 am

Thanks man! Much appreciate!
