Thread: [User markt takeover4u UID=3902931 INFECTING MEMBERS?](#)

ProfitableFlip - October 4, 2018, 9:32 am

Closing this for now, as he's not the "CREATOR" although the files still throw that detection, but here's the spoiler If you wanted to read it.

Spoiler ([Click to View](#))

It's come to my attention that the user markt takeover4u is spreading malware.

Sadly, as good as it seemed to be, The Bot Empire the creators of "Browser Automation Studio" has been spreading infected files here on the forum.

Upon Executing the browserautomationstudio.exe I got this message from Avast:
<https://gyazo.com/bf030fb5aff86eeefd90e320e5b76ae2>

Also Upon opening the file, it creates 2 files:

AddAVExclusion on the main root folder
FastExecuteScript on a hidden folder.

And to finish it all, he is partnered up with someone under the alias of Skyline, who's very well known in RAT's and malware.

Very sad to see this, I expected much more from you both.

PLEASE, someone check the files out and report back here.
If this is NOT MALWARE once analyzed and reported I will REMOVE this.

traveling-monk - October 4, 2018, 9:48 am

This is funny for sure... i will be the better person here and not rip into this person.

The files he is referring to are part of the browser automation studio framework which has been downloaded by millions of people to make software and bots, i do not own the software it is free to download by anyone.

Just a sample to prove that this person has no idea what he is talking about

"Sadly, as good as it seemed to be, The Bot Empire the creators of "Browser Automation Studio" has been spreading infected files here on the forum."

I do not own Browser automation studio please do your homework before making posts.. it is free to download by anyone i teach how to use the product but i do not own it at all.

he is also implying that me or my partner own BAS and have added malware to it..

as i said i don't own the framework and it is used by a huge community (like ubot studios for example)

I will leave it there people are free to make their own judgment

Bullshit, you even changed your display name, classic trash move from scammers when called out. As if no one would search your uid. @op you should put the bins somewhere, so people can have a look. If it's a skidtool type of rat, there is probably a shitload of exploits within to execute arbitrary code

(assuming someone want to fuck with it).

Lol, glad someone else has been watching this scammer and all his moves and not just me.
