Thread: [Silent USB Stealer](#)

Gerdos - October 5, 2018, 6:39 pm

Hi guys,

I was wondering if somebody has created a silent auto-run USB stealer for Windows that basically copies over important files to the USB. If there is none, how would one go to create it?

PerfectStorm - October 5, 2018, 6:40 pm

Sounds like rubberducky? same idea.

Its definitely a good one. Id also recommend a pineapple, especially if its a residential or low tier commercial space.
