prodigypsy1234 - October 10, 2018, 4:30 am

interested in buying, pmed you

eightz - October 10, 2018, 4:51 am

I'm interested in purchasing for PS4 but it won't be for another couple hours since I'm at work.

I heard cheap vbucks methods didn't work for PS4 but you claim here it does, so I guess we'll see. I'll be purchasing the \$49 option.

I got cashapp for you for \$15 wroth of vbucks. I aint broke. \$15 aint shit just want vbucks. dont have crypto.

Indica Only - October 10, 2018, 3:21 pm

This method works for ps4 as any other method now, simply because the method achieving this doesn't matter anymore. Playstation removed their limitation on cross-plat so now these services can get the vbucks for you on their PC/xbox and then you can sign then to use the vbucks on ps4. Them removing the limitation was a god-send. Great prices, good luck with sales!

As i have similar type of audience to resell i want to ask you a few questions.

1) what is the worst things could happen if someone use this? BANN, BLOCKED. SUSPEND?
Please let me know details.

2) is there any limitation that which country can't use this?

3) Also if you offer discount for resell shoot me pm.

I am willing to know more details about it. Let me know
