Thread: [Alpha Crypter V2 - Development thread](#)

Securifier - October 7, 2018, 11:25 am

Hey HackForums. I'm coding Alpha Crypter V2.
It will be the most modular crypter ever.

[Very small video about the GUI here](#)

Tons of options will be available, in a drag n drop intuitive GUI.

The GUI id divided in two parts : Action to execute on first run, and action to execute at every start.
The execution flow is customizable by the user.
The more high you put it, the first it will be executed.

Take a look at this :

In this case, on execution :

[ONLY AT First Run]

- 1) A message box is shown to the user
- 2) The binded file drops and executed
- 3) The file install itself to the computer
- 4) A downloaded file is dropped and executed

[At every run]

- 5) The program sleeps 20s
- 6) It gets admin rights by the force
- 7) It inject the crypted payload with a RunPe method

More options are comming !

When clicking Build, the informations are parsed and send to a remote build server, that will select only the lines of code you need, and randomize all to create a nearly unique stub.

The build server will compile, obfuscate, add icon and assembly, and then, send you back the crypted file.

The crypter GUI is coded in ElectronJS, the BuildServer in C#.
Stub will be C#, compiled in .NET 2.0.

This crypter will be compatible with almost all programs, native and .NET.
Injection methods are : Runpe (Itself, vbc, cvtres) and Reflection.

If you have any question, just ask :)

If you are WebDesigned and you want to help me with front-end, post here (electron Js is Js + Html + css).

Current Alpha Crypter users will keep their subscription on this crypter (maybe on a lite version).

3DES - October 7, 2018, 12:12 pm

Why so many options? Crypters job is to crypt with minimal everything. Not this BS

Tempr5 - October 7, 2018, 7:07 pm

Will this be working with netwire?

Dmannman - October 7, 2018, 9:02 pm

Hey bro good luck, cant wait for it to come out. Any ETA in mind? ?

Securifier - October 8, 2018, 2:30 am

(Oct 7, 2018 12:12 PM)3DES Wrote: [\[CITE\]](#) Why so many options? Crypters job is to crypt with minimal everything. Not this BS

This is exactly Alpha Crypter V1, no options, just FUD.

I will implement a Lite and a Pro version.

Lite with Encrypted Payload injection, and Startup.

And Pro with all options.

(Oct 7, 2018 07:07 PM)Tempr5 Wrote: [\[CITE\]](#) Will this be working with netwire?

I think yes. Tested and working with IM5 (obfuscated .NET), RevengeRAT (Standar .NET) and Native programs (as netwire).

Tempr5 - October 8, 2018, 2:31 am

(Oct 7, 2018 09:02 PM)Dmannman Wrote: [\[CITE\]](#) Hey bro good luck, cant wait for it to come out. Any ETA in mind? ?

I think the first release will be in less than one month.

Options will come with time.

Cød3ing - October 8, 2018, 2:37 am

(Oct 7, 2018 11:25 AM)Alpha Coder Wrote: [\[CITE\]](#) BuildServer in C#.

say no more

Securifier - October 8, 2018, 3:12 am

(Oct 8, 2018 02:37 AM)Cød3ing Wrote: [\[CITE\]](#) say no more
Wtf ? Whats wrong with a C# Build server ?

The Electron Desktop app will just connect to a remote server, with build informations.

The server will compile the app as the user asked, and send it back to desktop app.

C# is good for this task.

Support of WebSockets and HTTP Request (asp.net) allows me to create a powerful API.
Easy strings manipulation, and multithreading support allows me to create unique sources automatically under user demand.

External compiler, and obfuscator will be called after the source is generated.

NYANxCAT - October 8, 2018, 4:26 am

Good job and good luck. You don't have to explain why you use c#. Ignore stupid people and move on.

I agree with you. C# is not a bad thing for a Build Server. But tbh, I don't understand why you code your stub in C# with .NET dependencies and not in a native language like C.

Securifier - October 8, 2018, 9:16 am

(Oct 8, 2018 08:57 AM)MemoryLeak0 Wrote: [\[CITE\]](#) I agree with you. C# is not a bad thing for a Build Server. But tbh, I don't understand why you code your stub in C# with .NET dependencies and not in a native language like C.

Yes... That's an interesting topic...

.NET framework offers advantages next to C.
I code a lot of C, that's not the problem.

With C# :

- Strong post build obfuscations possible
- Easy to code features / options (fast recompile for refud)
- Stable host process for managed programs (itself injection). Most good rats rate .NET, being .net compatible is crucial.

Moreover, .NET 2.0 is included by default in Windows since Windows 7.

But, I totally agree with your post. C is better than C#.

I also coded a crypter in the past with C#. It wasn't that bad for scantime I have to admit, but when it comes to runtime stuff C (or another native language) is superior in my opinion.

For example, how do you prevent user-mode API hooks of AV's? Behind the scenes, even C# uses the Native Windows API. In C you can use direct system calls with inline assembler to evade the ntdll hooking or you simply overwrite the hooked function with the original code.

borito80 - October 8, 2018, 9:36 am

(Oct 8, 2018 09:16 AM)Alpha Coder Wrote: [\[CITE\]](#) Moreover, .NET 2.0 is included by default in Windows since Windows 7.

Actually starting from windows 8 it is not activated by default .net 2

Securifier - October 9, 2018, 7:02 am

First file created with the build server :)
Adding features and GUI improvements.

kaiketchum - October 11, 2018, 2:44 pm

Do you have any idea what the price will be?

Securifier - October 15, 2018, 1:10 am

Prices are not final.

Have you any suggestions ?

- Easy to code features / options (fast recode for refud)
- Stable host process for managed programs (itself injection). Most good rats rat .NET, being .net compatible is crucial.

Moreover, .NET 2.0 is included by default in Windows since Windows 7.

But, i totally agree with your post. C is better than C#.Would a native version be possible only with basic options?

Securifier - October 18, 2018, 7:11 am

I don't know, first, i will release the normal version.

Comming soon :)

borito80 - October 23, 2018, 8:32 am

(Oct 7, 2018 11:25 AM)Alpha Coder Wrote: [\[CITE\]](#)

The crypter GUI is coded in ElectronJS, the BuildServer in C#.
Stub will be C#, compiled in .NET 2.0.

Please check...

From windows 8+ you have to activate netframework 3.5 from the control panel.

<https://docs.microsoft.com/en-us/dotnet/framework/migration-guide/versions-and-dependencies>

Athr - November 15, 2018, 10:50 am

Interesting UI. Good luck Alpha Coder.

SIM-2974208 - November 16, 2018, 5:38 am

from what Repo u got the source LMAO

Securifier - November 16, 2018, 7:14 am

(Nov 16, 2018 06:38 AM)astate Wrote: [\[CITE\]](#) from what Repo u got the source LMAO
From the private repo i created for the project the day i started it.
I coded all from scratch.

(Nov 15, 2018 11:50 AM)Athr Wrote: [\[CITE\]](#) Interesting UI. Good luck Alpha Coder.
I'm baaad in front end ?
But thanks.

realsunjester - November 16, 2018, 7:18 am

The title of the thread said development, but I didn't see any development.

Securifier - November 16, 2018, 7:27 am

(Nov 16, 2018 08:18 AM)realsunjester Wrote: [\[CITE\]](#) The title of the thread said development, but I didn't see any development.
I posted the project status when i coded new features. Thats all.
I'm also listening everyone view. I'm open for questions and critics here.

antex - December 18, 2018, 8:40 pm

is a fraud
cryptor does not work
and not updated

Securifier - December 19, 2018, 1:12 am

Here the latest updates :

Here the TOS :

Your account informations :

As we can see, your last login was 1 month ago, and your credit is \$10.
That mean that you neved used the free credit you got to test the new version of Alpha.
You DID NOT EVEN TESTED the crypter, and you are crying like a kid.

This is a developpement thread, please keep clean.

Securifier - December 19, 2018, 2:42 am

(Dec 19, 2018 02:46 AM)antex Wrote: [\[CITE\]](#) cryptor does not work

and not updated
the seller is an absolute ass
I recommend not contacting him
You are talking shit about a product you did not even tested !

I have nothing to reproach myself. So you have 3 choices :

- 1) You open a deal dispute, and you loose your time because i'm not wrong?
- 2) You stop posting trash, and forget me.
- 3) You keep posting, and i report you because you are trashing a developement thread.

antex - December 19, 2018, 2:52 am

I paid for a lifetime license
cryptor does not work
and after the payment I will find out that I need to pay for each crypt

the seller is a cheater!
don't deal with him

B E A S T - December 19, 2018, 2:53 am

antex - February 2, 2019, 7:10 am

I warned already
that the seller is a liar
cryptor does not work

Securifier - February 3, 2019, 10:50 pm

Stub refud

Sorry for not coding new options, i'm do not have time right now :/
But there are already a lot included in the crypter !

I did a minor builder update, disabling the PayPal button.

Frixas - February 4, 2019, 5:19 am

this crypter is gay as fuck this guy is skid that followed online tutorials how to make a fake program and just stole our money, i bought 1 month package asked for a refund and he didn't give it to me, that's why he wants you to pay as family or firmed cause you can't chargeback then, he's just scamming guys like you for money, dont get fooled by this, this is garbage, skid scammer reported, even waited about 2 weeks and still no refud, and after all that, when itried to chargeback he banned my license DO NOT BUY IT BEWARE!!!!!!!!!!!!

Securifier - February 4, 2019, 12:27 pm

The crypter works. You can't scam me using paypal like that.

I banned you because of T.O.S.

Frixas - February 5, 2019, 9:12 am

It doesnt you dumb fuck it hasn't been updated or refud for 3 weeks f u cunt, sorry my swears but this shit cunt is a SCAMMMER!

Mercury - February 6, 2019, 5:52 am

This is a cool project. I've been watching for some time. You can consider me a customer.

Alles auf Rot - February 6, 2019, 10:50 am

I would be interested too. Will look into this. I saw you have demo videos online.

FriendlyLurker - February 24, 2019, 2:43 pm

I have a question, why are so many stubs .NET 2.0? Is that even preinstalled on Windows 7? I know when I have to run .NET 2.0 binaries on windows 10 I have to go and download the .net 2.0 framework for it run. So in that essence this won't even run on fresh Windows 10 installs? Correct

me if I'm wrong

V3xD - February 24, 2019, 2:48 pm

(Feb 24, 2019 03:43 PM)FriendlyLurker Wrote: [\[CITE\]](#) I have a question, why are so many stubs .NET 2.0? Is that even preinstalled on Windows 7? Correct me if I'm wrong

You are correct thats why .net crypters suck compared to vb6 for example

FriendlyLurker - February 24, 2019, 3:08 pm

(Feb 24, 2019 03:48 PM)V3xD Wrote: [\[CITE\]](#) You are correct thats why .net crypters suck compared to vb6 for example

Yeah that'd be one solution, or the devs could make the stub .net 4.0, I'd think much more people would have .NET 4.0 than some ancient version from 2005

tdoxent - March 27, 2019, 12:15 pm
