Thread: [Design our HF group userbar!! 10k byte prize + \\$50.](#)

Mr. Robot - October 8, 2018, 1:38 pm

So I know some of you aren't that talented in the graphics department so that's why Trust and I have decided to do it this way.

You can make it HQ or even in paint - As long as it's the userbar style/size that's all that matters. If we pick your design we will put it to someone else to create a higher quality version for our group.

Our group name is Cyber Gentlemen - personally thinking of more gentlemen things incorporated - moustaches/hats/whiskey/cigars who knows. Make it and see how you go. As many entries as you want.

End date 1 week from today.

One entry so far.

>> A concept design I like which I have talked about offsite is possibly a desk down angle or side view showing monitors on the desk - a top hat somewhere, cane maybe? Cigar and ash tray - whiskey glass so forth. Think of that kind of design I think.

You can try to work with someone else and give them your idea to design it. There might be a problem with sharing the profits afterwards though.

Hey man no problem, A friend and I were talking offsite about ideas and he mentioned something maybe like a side view of a table or looking down at a table. Maybe with monitors on the desk, a top hat hanging on the corner of the desk, a glass of whiskey or something on there with maybe a traditional razor or beard comb.

https://images-na.ssl-images-amazon.com/images/I/41FF-Eek%2BkL._SX466_.jpg

I think a design like that could just take the cake.

Or maybe see what it looks like just on the center guy, a btc icon. Or on the top hat. Just to add to the crypto aspect

You can try one with and without the table, tbh. What's good about the tables and screens - it gives this so-called cyber element and the gentlemen element is the other figure.

Animated really helps appeal to the second part of the group name. I like it, added some more opinions in my previous post. I hope i'm not being a pain lmao it looks pretty good so far just a few touches and that'd legit be 100% the winner I think.

Is it possible to make the matrix flow look constant, it seems like there's a part when the animation resets and it just sticks out? Or is it just me... Like it flashes or sth.

Nice one though.

Yeah trying to figure out what the heck happened just noticed it myself must be a off frame somewere.

Seem to be abit better redone the the Animation

made some minor changes to the one above.

The one without the salami in his mouth looks better in my opinion. However, you can try different pipes/cigars - maybe there is a good alternative. Thanks.

Or y'know read the original thread... Clearly mentioned this was for a base concept that would be

redesigned but the other user has done such a nice job so far, might as well stick with it.

\$50 and 10,000 bytes is definitely worth concept art which I clearly said could be made in paint. Maybe if you y'know didn't just read titles and think that's all there is to it.

Big edit; Just saw your posts now haha. I'm no designer but I can make up one in the head, but if I were to try to draw it..

Anyways would look pretty neat (if someone with the skills did it) ((i think)) - One gentlemen on the left side, looking right, with a white hat.

And another (same) gentleman on the right side, looking to the left, with a black hat. Perhaps cheering(thats the word?) with a glas of wine.

Meaning they are raising their glasses towards the middle of the UB, and yeah then some cyber-ish stuff all around and so on.

Leaving the middle kinda open for what fits. An open laptop with an oldschoool Matrix (green code rolling down) on the screen, for example.

That's what I can offer an idea; bad or good I am not sure but in my head it looks pretty clean! ?

seems user mr robot likes beards and such as says he wants a cigar and hat and beard so tells me a wine glass is not what group is after. as willing to make an attempt if mr robot can make more clear what he exactly wants in this such userbar so no time wasted

Contest ending now! We like Banters determination and dedication - we have chosen to not only edit it but keep it as is, it's not perfect but that's what makes it ours.

Please send/post your BTC address on the thread Banter and we will get on to it now. If you can also send the psd if you have them through to both Woofer and I or just upload them for the thread so anyone can grab them, that's fine too.

It would have be interesting to see how it looked with a grey (or some other color) "bar" behind it and the top and bottom of the guy going "over" the bar at the top and bottom.

But honestly I think my suggestion above wouldn't look too good. It's actually very good looking and

get's better and better every time I look at it.

Yeah i mean adding a bar into the background could be done in seconds really ?

i tried it a few times with it was not 100% sure on it really , i mean you can add a grey bar behind and turn the Animation opacity up.

there is so many little things really that can be done ?

i felt like adding colour to it throws it off i mean alot of user bars have it already so its good to be different

Just incorporate this into your userbar somehow:

Doesn't get more gentlemanly than Mr. Peanut. (TIL gentlemanly is a word)

Also @ your OP, whoever made the cyber gents userbars at the bottom made the cigar(?) absolutely massive. I know they wanted to make it clear that something is being smoked, but the size of the cigar in proportion to anything else in the userbar is giant. I'm aware that there probably are 2 foot long cigars out there, but I fear you're probably leaving your gentleman-like nature by smoking one as that's just intense...
