Thread: [My reply post isnt showing in a thread? Possible bug?](#)

Pikachu - October 8, 2018, 6:04 pm

So i went ahead and replied to a thread in the Anime section regarding anime wallpapers. I posted a reply but my response doesnt show in the thread, but when i check to see my most recent posts, it says i have posted in that thread, when i click on it to take me to my reply, its not even there. I think others have experienced this issue before as well, if i remember correctly, it was a couple months ago i think i saw someone post something similar to the issue i'm having now.

The thread in question:

<https://hackforums.net/showthread.php?tid=5892831&pid=57692680#pid57692680>

Last post that is shown in the thread:

Can you still not see it? I can see it and I don't think it'd be a permissions bug.

Shad0wM - October 8, 2018, 6:59 pm

I can see your post, but i know what you mean, that happens to me too sometimes.

May it be a issue with cookies?

Punisher - October 8, 2018, 8:47 pm

Your browser probably cached the thread and didn't realize the content changed. A simple clearing of your browsers cookies and cache should fix it.

Pikachu - October 8, 2018, 10:52 pm

yea everything seems fine now. I can see my post now.
