I'm an old school e whore guy put in 4 years between 2009 - 2013. I'm experienced with mostly email auto responders for Craigslist personals which no longer exists and using programs and bots for sites which seem like ghost towns now. I've been checking out some of the advice on here. Its the best black hat style forum I've found on the non dark web. I'm just finding most 2018 methods are for selling packs. I'm look for 2018 methods and tips on how to market dating sites mainstream and adult for per lead and per sale sign ups. Any advice or ebooks on this style of e whoring would be great. Please pm me and share here. I have a little to offer with how I made a lot of money daily with my past methods they maybe still able to work now with a little collaboration of new techniques and up to date methods. ? Definitely pm me any advice and I will share everything I can to help you too. ?
