Thread: [Buddy List Popup Change](#)

Xerotic - October 9, 2018, 3:14 pm

If you click the "Buddies" link for the popup you will now see two links that will bring you to either your Buddy's Posts or Threads. Useful search tools to keep up to date on your HF buddies.

We made the links a couple months ago but we never actually had them linked anywhere:

Enjoy.

This should be a really helpful link for members.

Just a suggestion, more of a QOL improvement for that list.

Just a quick way to remove them from the list incase they are closed or banned or no longer active?
Perhaps just a "X" near/next to their name?

Really nice, saves users from having to go into the person profile and look for there threads that way.

Great add Xerotic.

Too easy to make a mistake and you have full Buddy List control from User CP.
