Sent 70\$ in btc/0.01604 btc for 100\$ Amazon Gift card, and the user after 15 minutes of waiting says he can't find the code for the Amazon Gift card he was supposed to sell me, and says he will refund.

Have now been waiting for over an hour and nothing..

Check my contracts (can't post links etc yet)

Update: he has now put me on the ignore list, so he has without doubt scammed me..
