No one will buy it for that price and without concrete proof, with your lack of posts and rep.

Also, I have positive feedback from selling aws accounts with credits loaded.

Rep means nothing on this forum since you can rep for rep and the post count is irrelevant...

Well I can show you proof with the credits if you want. Also, the fact that I accept escrow might look legitimate.

What do you want me to do? Share the method to everyone and expect for a vouch in exchange of a money making method ? Not anymore....

This thread will remain available until I receive my new phone numbers to make aws accounts.

Is this even for real? I know the method to get free USA credit but it's with VCC, everything else is carding ... so I'm not sure about this but if you have good proof or something this deal sounds good.

Yes it's real. It's not carding. Why would I struggle with credits if it was carding?

Get someone credible on this forum to vouch for your service and I'll buy this in a heartbeat.

~HF~ - October 19, 2018, 3:51 pm

if you give out a vouch or provide solid proof you could sell this easily to multiple people. Just letting you know.

sourdiesel87 - October 19, 2018, 4:09 pm

How long does it take to get the account from start to finish? What kind of profits are you saying daily with your mining?

Depending on the amount of credits you are aiming for. Starts from 3 days if you go for \$1000 to 2 months for \$100k

You make around \$100 per account, but this amount depends on the coin's price and difficulty.

You keep claiming that you are legit because you are willing to use an escrow.

That definitely isn't enough as you can see.

People want real proof, they want to see a HQ member reviewing this aswell.

What is the issue? Just upload decent proof and give out 1 vouch copy like everyone else does.

Yes I keep claiming that I am legit because I am willing to use escrow.

I don't give my work for free. I'm done with the "vouch copy" shit.

If nobody wants it, guess they can buy accounts from me later.

Thanks for the bump tho

I doubt anyone will buy without a vouch from a trusted member. But nonetheless seems interesting, good luck with it.

SIM-1808688 - October 20, 2018, 8:25 am

I don't know Overciff but to be honest then he do have some fair points. E-books always; ALWAYS get leaked, what prevents a "popular trusted member" to tell his friends or make a business himself? Trusted members have been seen scamming people on HF before. Sorry I would be totally like Overciff in this case (besides it's Overciff who decides if he want to give a vouch copy or not, calling him "sketcy" for not, is just pain saletrashing.).

OP have sold accounts with 1k credit which has received feedback on a thirdparty site. I would totally buy the method if I could trust the basic/full method wouldn't be sold to anyone else; but in that case i don't trust anyone. This method could surely make ALOT of bucks. 800 is a steal.

Thanks for answering my questions. I'm very interested. I have a need for the aws servers anyways, but I'm really interested in the mining you do since I've always been banned when I tried. Could you please PM me more details like a realistic amount I can make daily mining?

Well I make around \$100 per month per account mining xmr. That would be around \$3.3 per day for an account.

Not much, but you can make more accounts and have them mining. There's a bit of work to make it worthwhile.

Most I made was \$120 and least was \$90 since the price is volatile along with the mining difficulty.

If you think I am selling a \$5000/day method, you got the wrong thread.

I don't want it free nor do I expect you to give a copy away as a vouch - I'm simply stating that if you manage to sell this to someone that is credible that can vouch, I will gladly buy this in a heartbeat. Granted it's exactly what you're advertising.

Id be willing to buy the method if you gave me the \$800 pack for \$300. That way I can vouch for you and you will generate 2-3 sales minimum from my review.

Would be nice if you replied to me on skype. I bought an account from you that should have lasted 3 months, it hasn't even lasted a full 2 months without getting suspended.
