Thread: [Start you own Social Media Boosting website today!](#)

Shad0wM - *October 10, 2018, 8:51 am*

Hello HackForums!

I'm professional web developer with over 5 years of experience in web development.

I'm currently working on a "Social Media Boosting" website, but as I am not interested in running one,

I decided to post a thread here, and see if anyone is interested in running one.

If you are interested in starting your own SMM (SMB) website and earning money from it, I'm pretty sure I am the best solution out there.

Price:

Price is not fixed, but it's starting from 49.99\$

Exact price depends on your needs.

Please, contact me in order to discuss the price.

Features/Options of Website:

Please note that these are just some of them, there are a really lot of features.

I can also do custom/additional features if needed, for a decent price.

Website has automatic Paypal and Skrill payments, and semi-automatic crypto payments.

There is Advanced and Functional admin panel from which you can manage categories, services, users, payments, gateways, support tickets, literally everything...

There is also a Client Area, a panel for customers to buy services.

Also there is a reseller option, so you can set specific users to a reseller group for cheaper prices, etc...

Complete support hub (faq, knowledge base, live chat, tickets, etc...)

& more...

Contact:

If you have any pre-sale questions, regarding my web development or this website especially, please contact me.

Also if you need live demo, screenshots, proofs or whatever, dont hesitate to ask

Sounds interesting...

Can you send me a PM with more details and screenshots of this?

Entim Inc - *October 13, 2018, 12:23 pm*

I'm interested in this for sure.

I am curious, shoot me a pm. Just want to see a few screenshots and how the selling likes and stuff goes.

Shad0wM - *October 16, 2018, 1:31 pm*

I am accepting new offers.

Hey there, am interested. Do you know if these will pull from any other services or are these being hosted on our own server?

I'll show you where you can get the cheapest followers/likes + some methods to get them for free with a bit of work.
