I know I'm not the cheapest but i've lowered my price. However, I've been half a year selling this vbuck with 0 problems.

PM if you're interested

Only crypto for now

See my profile for old threads and contracts for vouches

You have to bring me your login details in order to load the vbucks.

Community alert: Be carefull with cheap vbucks services. They use stolen PP or CC and buy vbucks saying that is the argentinian method. Your epic account should be banned if the CC/PP get's chargebacked

Where are the vouches? And how does pricing work for ps4?

(Oct 13, 2018 06:24 PM)Fa?I Wrote: [\[CITE\]](#) Where are the vouches? And how does pricing work for ps4?

Hi, Fail!

You can see my contracts and my previous post in my profile page

<https://hackforums.net/member.php?action=profile&uid=3194930>

For ps4, You have to spend the vbucks on any other plattaform, then you'll have the items in any of them (including ps4). Vbucks are not transferible for ps4, just the skins.

If you can't run the game in any other plattaform to spend your vbucks, I can buy from you anything that you want from your account.

aangthelegend - October 16, 2018, 12:35 pm

MrKamarJ - October 16, 2018, 3:45 pm

So lets say, if I purchased vBucks for my main PS4 account, I wouldn't see the vbucks unless I logged into my main ps4 account, on mobile?

You just can't expend them on ps4 but, you can use them anywhere else and wear the skins on ps4

MrKamarJ - October 16, 2018, 11:47 pm

I've PMed you about a order, looking for your response! :D

HUGE VOUCH! Very patient and knowledgable seller! HIGHLY recommend! For any PS4 users confused about this, this can be done for you, you'll just need a second device to login to the fortnite game from to use the vbucks! Once logged in, just spend them like natural then the bought items will be available on your PS4.

Wait, so you are an Argentinian user, so you get really cheap vbucks.

13500 vbucks in argentina cost around \$20 and you are selling them for more than the half of the normal price, it's a difference of 54% from the original. Any explanation ?
