(Oct 15, 2018 04:48 AM)suspiciousgang Wrote: [\[CITE\]](#) Coded in what language and does it support #?

C/C++ Native crypter. It can run any native c++ executable. (Yes, it supports #)

Smile? - October 15, 2018, 11:31 pm

Very good crypter and fud , works perfect.

somenormalguy - October 16, 2018, 12:35 am

Does this support quasar ?

Bubbliz - October 16, 2018, 12:46 am

'Hey, I know I'm new but I would really love to test your crypter out. Can't PM you, do you mind sending me a PM with download link? thanks in advance mate, good luck ! :)

1. I have posted my pidgin account here, so feel free to messege me at h4z3@hacker.im.
2. I have posted the TOR url for the crypter and the serial keys below. (I will make a tutorial this evening and post it here)

tomas14 - October 16, 2018, 4:07 am

BIG VOUCH for this crypter! Works perfectly with startup. Its FUD!

Mr_Ahmed - October 16, 2018, 10:15 am

good bro You have done well friend

TonyLuprano - October 16, 2018, 10:56 am

Hi could I have a copy? I cannot send messages yet

At this moment the service is offline for updates.

kaiketchum - October 17, 2018, 12:41 pm

I would also like to be involved.

Delson - October 19, 2018, 4:42 pm

is this still going on? site seems to be down

ZERO2SIX - October 20, 2018, 8:02 am

great share, keep up the good work

Just shoot me a pm

Kio_88 - October 22, 2018, 1:59 pm

Cool. Did you test this with actual Java RATS? I dont know any tbh.

Takehito Morokuzu - October 23, 2018, 2:08 am

I can test this for you once you add .net support :)

Now im trying to finish UAC bypass.

Hope i will be done today and will start the service again.

+ Do i make the service available on the surface web?

Phyme - October 29, 2018, 12:47 am

Cool to hear you getting good feedback, lets make you the next big one here!

Any possibility to try it out? Im currently on the look for a fud crypter and id love to test yours.

Best of wishes

Yeetus1010 - October 29, 2018, 5:13 am

Hi I don't know how to pm or email it keeps popping up with I can't do it but I would love to test it is there another way I could get it?

Sorry, the crypter is still in developments.

It's hard to manage time when it's a non-profit project.

I have a job + university, so sorry im going to try to finish the service by the end of the week.

The registration(for testing account) will be free and it will grant you free crypts for a week.

So be kind and patient, you can donate to support stability of the project.

(Oct 30, 2018 08:31 AM)hans133723 Wrote: [\[CITE\]](#) Hi! Your crypter does support Darkcomet? o

Yes, it does. It supports darkcomet, babylon, # and all of the c++/Native tools.

After im done it will support .NET tools too.

Java tools wont be supported.
