Thread: [\[CodeIgniter\] Searching for ideas](#)

inf0 - October 15, 2018, 2:01 am

Hi,

I'm new to CodeIgniter development and I'm looking for good ideas to develop. Do you have any ideas?

I thought about creating a login/registration website just for learning purposes, but it's boring and nothing special. So I'm looking for cool and interesting ideas.

CRUD applications are the best ways to practice a framework you're not familiar with. Something like a simple blog would be great, you could go as deep as you want. It's not the most exciting thing to build but if you're looking to build something for learning purposes then it's a good start.

CRUD stands for create, read, update, delete btw.

He is absolutely right, maybe you have an idea for something you can sell, or try the marketplace "coder for hire" for inspiration.

(Oct 17, 2018 09:52 AM)Yani Wrote: [\[CITE\]](#) Yeah lol. Even searching for "list of project ideas" didn't work.

I have it bookmarked, but couldn't remember in which folder ?
