Thread: [Reportbot works, or i am lucky](#)

baitorgaitor - October 16, 2018, 12:55 pm

So i just reportbotted some guy, with an fresh CS GO account. 2 hours later he got game ban. i think he had 12-15 hours of cs go.

He got 22 reports, and atleast 1 ingame report.

I've reportbotted 4 guys, so there is 3 more to get game ban. I'll keep you guys updated.

PingersAndMash - October 16, 2018, 1:27 pm

Yes it works everyone should knows this

JW1337 - October 16, 2018, 2:43 pm

yes it still works, valve say it doesn't but they are lying.

SIM-3970461 - October 16, 2018, 6:30 pm

No it doesn't work. If he was raging then it's natural that he got banned.

OffCode - October 17, 2018, 12:15 am

Reportbots works fine, Not patched yet

He was not raging.

CheatsHunter - October 17, 2018, 7:29 am

in my opinion, they are patched.

there will be always someone saying they do, and someone saying they don't.

My experience is that they don't work, either as a " victim " of them

Menalix - October 17, 2018, 7:46 am

They still work, it's so obvious to anyone knowing how they work.

he probably raged a game or before yours

either way report bots dont work. i would be banned by now if they did.

PingersAndMash - October 17, 2018, 7:45 pm

because not many people use them as much anymore cbf ^^

gdz\$ - October 17, 2018, 10:57 pm

Been using report bots for years getting rid of cheaters in my games lmao.

CatalystFTW - October 18, 2018, 4:08 am

I dont think they work anymore. The people that you manage to ban played multiple games like that,

if it was really working there would be 0 exceptions. Unless one of you have an explanation for those people who didnt get banned sometimes even after raging you cant say they work.

They work and always have, every single person I have report bottled after raging has been banned in under 12 hours but sometimes as late as 18 hours but no later than that; even when they stop playing straight after that game (steam profile goes offline). Even some I know only play 1 or 2 games a day but play with things such as legit aa and go really blatant get banned in under 18 hours after being reported also, just depends on who is reviewing case in overwatch so that is hit or miss but every single rager has been banned in a day after being bottled.

I don't think there is any possible way for valve to fully fix them anyway, they just lie to cover their own tracks. Such as when they said it's not 11 reports that gets someone sent into overwatch but if that were the case then why before reportbots were made very public could you play 2 rage games a day fine with no problems for months.

that's because they fucking rage or are shit at legit hacking and got tons of reports by normal players

report bots are dead and wont work atm

I've been blatant on my main and plenty of other accounts. I've been reported by zoner and other shit report bots and not a single one of my accounts have been banned.

What you just said made absolutely no sense at all; "that's because they fucking rage or are shit at legit hacking and got tons of reports by normal players"

Yea no shit if they are raging or are shit at legit hacking they are gonna get overwatch banned, reportbots report you enough to force you into the queue????????????????, of course if you are not going blatant enough to where overwatchers think you're cheating then you will not get

banned.

The ragers I play against play 1 or 2 games a day, always going offline after the game finishes so I know for a fact they do not play anymore games.

Ozaar - October 18, 2018, 12:25 pm

Reportbot's dont work. Patched a long time ago.

Yeah it doesn't work.

Doesn't matter. I raged 5 games and I'm sure I got report botted. My acc seems to be fine after 21 hrs. LOL

Keep wasting money on services that don't actually exist. ?

I just love how you say all this shit but don't give a link to profile, screenshot of game history or anything. Reportbot services are a waste of money I agree that's why you just buy the accounts yourself for cheaper and get a longer-term investment.

Not gonna argue anymore since it's just stupid, believe what you want in this day and age but I am speaking from MY experiences every single rager I've report botted has been banned in under 18 hours.

e; and of course you will have a different experience and opinion.

Are the methods still public? I was told they were fixed a while ago so i started playing blatantly 1 game a day and even when people tell me they've zonerbotted me and shit i never get banned.

Yeah reportbots work fine.

PingersAndMash - *October 23, 2018, 11:40 pm*

I CAN CONFIRM THEY 100% WORK BANNED A FEW LEGIT CHEATERS LAST NIGHT YOZA
