Thread: [High Pay, Expert Coders Only *READ*](#)

jdlevine - October 18, 2018, 2:55 pm

Greetings Hackforums Community,

I'm in need of someone with superior credentials and reputation within this community who is capable of coding a supreme Bot for me. I am paying for quality and professionalism, if you think you meet my criteria please direct message me/ reply so that I will contact you myself.

I'm looking to have this done in the next 3-4 weeks at maximum.

Infamia - October 18, 2018, 3:13 pm

well i don't have the reputation but i have the credentials: 6 years with intermixed professional and amateur python; experience with bot creation, web scraping, data analysis and any further requisites of bots.

what's the specification?

post it here.

ekkJackYouLate - October 18, 2018, 3:37 pm

Yeah, you should specify what kind of "bot" you're looking for. It's a very vague term.

jdlevine - October 18, 2018, 3:59 pm

@ekkjackyoulate Thank you I didn't realize I missed such a crucial detail. @infamia Bot creation: In specific a supreme Bot. Let me know if you are interested.

For whoever dm'd me, I can't use private messages yet. Please send me your email if you have dm'd me and I will get in touch with you.

michalmonday - October 19, 2018, 5:18 pm

I googled "supreme Bot" but it didn't help... Is it a bot that interacts with website of the company called "supreme"?

mirashop - October 19, 2018, 5:21 pm

Send more information on requirements in PM

koolkid - October 21, 2018, 6:25 pm

hello dm me the info and we will see how it goes

It is a bot that automatically buys items for you. I want it to be able to identify items and purchase them automatically. I want it to have specifications for things such as color, shoe size, ect..

here are more things I'm looking for:

MULTI THREADED

AUTO CHECKOUT AUTO RETRY ON FAILURE

*FREQUENT UPDATES

*PROXY SUPPORT

*UTILIZE MULTIPLE VPN'S

ABILITY TO PURCHASE MULTIPLE ITEMS AT THE SAME TIME BYPASS BOT DETECTION SYSTEMS (IN OTHERS WORDS, BE FUNCTIONAL)

** FOR ALL OF YOU SAYNG TO PM YOU , I CAN NOT I AM A NEW ACCOUNT, PLEASE SEND ME YOUR E-MAIL VIA PM SINCE I AM ABLE TO READ THEM STILL**

Goodies - October 22, 2018, 1:59 am

Python programmer for 7 years. Depending on the requirements, I may be open to this.

(Oct 21, 2018 08:40 PM)jdlevine Wrote: [\[CITE\]](#) here are more things I'm looking for:ok

Quote:*MULTI THREADED

Multithreading in python is almost never beneficial due to the GIL (at least in terms of performance). Any multithreading for concurrent core utilization needs to be done outside of the context of python. If you're looking for rapid I/O response, it should be single-threaded async.

Quote:* AUTO CHECKOUT

Idk what that means.

Quote:*AUTO RETRY ON FAILURE

Literally just a while True: try/except idiom.

Quote:*FREQUENT UPDATES

Python 3's de-facto async library, asyncio, provides a ton of async scheduling features.

Quote:*PROXY SUPPORT

Easy. There are tons of libraries.

Quote:*UTILIZE MULTIPLE VPN'S

This is a little more complex than you might think. Each VPN creates a separate networking adapter, which therefore means there are different gateways. The easiest thing to do, honestly, would be to set up an external SOCKS proxy server that listens on each virtual VPN interface you want to utilize. Each adapter should give you a different IP address which differentiates it from the rest. Use that IP as the SOCKS proxy and traffic will be sent out that VPN adapter.

Quote: ABILITY TO PURCHASE MULTIPLE ITEMS AT THE SAME TIME

Oh, this is for some purchase thing...

Quote:*BYPASS BOT DETECTION SYSTEMS (IN OTHERS WORDS, BE FUNCTIONAL)

** FOR ALL OF YOU SAYNG TO PM YOU , I CAN NOT I AM A NEW ACCOUNT, PLEASE SEND ME YOUR E-MAIL VIA PM SINCE I AM ABLE TO READ THEM STILL**

Yeah, this isn't up my alley. I'm more of a professional backend designer, not a "bot" creator.

jdlevine - October 22, 2018, 4:18 pm

Message me on Discord @ jdlevine#4092 if you're interested, I can't communicate via pm's because I haven't met the post requirement yet.
