?ch?m?ll?? - October 19, 2018, 11:02 am

OP is a friend of mine and knows his shit. GL reducing the noobs on HF mate ?

Exodus - October 19, 2018, 11:05 am

You should probably read the rules: <https://hackforums.net/misc.php?action=help&hid=10>

Rule 16 states: "No advertising of Discord channels or usernames."

St. Dismas - October 19, 2018, 11:53 am

(Oct 19, 2018 11:02 AM)?ch?m?ll?? Wrote: [\[CITE\]](#) OP is a friend of mine and knows his shit. GL reducing the noobs on HF mate ?

Thanks bro ?

Thanks for the heads up, i just rectified it.

Business - October 19, 2018, 1:45 pm

Hopefully the intentions are good, but be careful. OP's account is 23 days old, he's got nothing to lose. I've seen a lot of people infect users this way, so hopefully this one is different.

NYANxCAT - October 19, 2018, 5:01 pm

Good service, Thanks for helping the community

St. Dismas - October 20, 2018, 10:02 am

i wouldn't want to waste the money i spent on upgrading to L33T, and loose my account for infecting a couple of noobs, i've got quite to loose, its all good intentions here, and thanks for looking out for people i know it gets rough out here sometimes ?

St. Dismas - October 23, 2018, 12:54 pm

service is still on, still here to help, send a PM if interested

GunsAndDragons - October 26, 2018, 4:07 pm

Great Thanks ! Gave some helpfull info

Ryan????? - October 27, 2018, 3:33 am

Are you still doing this buddy? Wanting to get started and I've got a few questions I'd love to ask if possible, thanks.

Hi, I'm new to RAT and would need some help. I started off with nanocore some months ago then I wasn't getting any client anymore. I switched to unknown and I'm hearing it's down (it hasn't run on my pc at all, keeps looping and closing)

I'd really appreciate if you assist

Don't know if nanocore is dead, sent my stud to a few people, they opened it but their system didn't reflect on my pc

I then decided to get unknown, when I put login details it attempts to login in several loops then it closes.

I need any of them to work well for me

Business - October 30, 2018, 5:02 pm

How do you send rat to a user?

St. Dismas - November 14, 2018, 12:12 pm

(Nov 14, 2018 12:18 PM)siroliverx Wrote: [\[CITE\]](#) How do you send rat to a user?
best way is through mail, but most people wont fall for it easily if its in an '.exe' extension, so you'll have to use an exploit first.

moneyworld001 - November 19, 2018, 2:09 am

added in skype ..please reply when your free..thanks in advance

just spoke with OP via skype... Trust me OP helped me lot without expecting any thing from me...
GREAT Thanks So much

sizzy1337 - November 19, 2018, 5:10 am

On behalf of all the noobs, thank you! I have also added you on Skype ?

Armada - November 19, 2018, 6:52 am

(Nov 14, 2018 01:12 PM)St. Dismas Wrote: [\[CITE\]](#) best way is through mail, but most people wont fall for it easily if its in an '.exe' extension, so you'll have to use an exploit first.

I would argue email is the least ideal solution to sending a Binary.

Emails go through numerous scans for malicious content and exploits such as DOC/PDF download exploits. Way too many ways to nuke or block the file.

I would say the best method to sending to someone is a direct file transfer and a bit of simple social manipulation.

- People will still run anything if you make them believe enough.

zelus - August 6, 2019, 11:08 am

My question is simple.

Is it possible to portforward in a Vmware workstation without a VPN?

If i have my VPN on in my main PC and a RAT is running in the VMware, does it still expose me?

Thanks

PANDORA - August 6, 2019, 11:51 am

(Aug 6, 2019 11:08 AM)zelus Wrote: [\[CITE\]](#) My question is simple.

Providing you have your VM Network settings configured to NAT, you won't be exposed.

However you may need to allow VMware to be configured in your firewall exception for the port in need.

zelus - August 6, 2019, 11:55 am

Alright, Just to be sure i understand you.

If i open 1000 in the VM

I should also allow the port in the main PC?

Then allow firewall exception for VMware or what?
