Thread: [>>TWITCH AFFILIATE ACCOUNTS | MAKE 1k IN 45 DAYS<<](#)

TwitchIncomes - October 20, 2018, 7:41 am

With a twitch affiliate account, you are able to stream on Twitch with a sub button which allows people to sub to your channel. You get 4.99 per sub but 50% goes to twitch. The requirements of a twitch affiliate account is:

At least 500 total minutes broadcast in the last 30 days.

At least 7 unique broadcast days in the last 30 days.

An average of 3 concurrent viewers or more over the last 30 days.

At least 50 Followers.

I'm basically going to help you skip all those steps and just give you an account with sub button ready! I will give you all the information to the account and will safely be yours to use.

Payment methods: BTC

Pricing:

Twitch affiliate account - 40\$

If you want to use your own channel and want me to help you get affiliated I can do that as well. If you need live viewers/offline channel views/subs feel free to pm me or add my skype atomic.pencil

If you know how to do it properly you will get payout as my customers have.

EL BB - October 21, 2018, 12:16 pm

Interested in an affiliate account. Do we need to be active with streams? Can you offer advice on getting payouts.. maintaining account etc

I'm new to twitch affiliates but interested.

Yes you should stream to get a payout. You need to give a reason for twitch to pay you. That means you would have to put followers/offline channel views and subs every week and just expand your numbers slowly. So streaming will help a lot! If you have any other questions or concerns feel free to add my skype or pm me.
