Thread: [Vaxton \[UID:3696619\] Helping og666 \[UID:3886494\] ratting people on HF](#)

In relation to this thread: <https://hackforums.net/showthread.php?tid=5897174>

Tldr; og666 didn't wanna do his method with his "python script" in my VM because he claimed it would not work in a VM. I didn't trust him and he told me to ask vaxton. I Pm'd vaxton and got a response. I did it and got ratted with this file

<https://www.virustotal.com/#/file/44f129de312409d8a2df55f655695e1d48d0db6f20c5c7803eb0032d8e6b53d0/behavior>

I was only infected for a few seconds as i use glasswire and saw that a new connection from a file called tmp.exe was appearing. I instantly turned off my internet and cleaned my computer so his attempt wasn't the best. Poor guy.

Screenshots of conversations:

Also, as soon as i asked vaxton afterwards why he was vouching for a scammer whose script didn't even worked (even though he claimed it did) i got neg repped, idgaf but this behaviour is just sketchy as fuck.

wait what? that guy pmed me today morning to show me how it works, it was legitly working, instagram bot (follow/unfollow).

he even gave me his vpn for free..

and you suddenly pmed me on hf and asked me if its working.

all i said that what he showed me was legit,, and its your choice if you wanna try it.
i didnt even vouch for it lol

and i neg rep you because of this:

"you didnt even pm me or asked me about him."

You can negrep me if you want, does not bother me at all. But what do you mean i did not PM you

and asked about him?

what i mean is, that you didn't ask me about what he's doing to you.
all you asked me is if he showed me the instagram bot and i replied with yes and its your choice to use it.
and he shouldn't use my name and he blocked me too lol
i can show you our conversation of today..
from when he said hi till the block

No.
<https://i.imgur.com/39tZwhF.png> <- My first PM i sent to you after he told me to ask you, i didn't ask if he showed you the bot i asked you if he was legit and when you told me you saw the python bot in action that is totally impossible considering it does not even exists.

The python bot did absolutely nothing, it executed a exe file somehow but other than that it did absolutely nothing.

vaxton - October 20, 2018, 12:51 pm

he downloaded this <https://github.com/instabot-py/instabot.py>
and showed me how it work.

thats all, unless he did this to get my vouch on his other fake files.
after i told him what you said, he blocked me right away.

(i will never vouch for anyone anymore)

Seems like he deleted his thread or something?

JonasBro - October 20, 2018, 1:43 pm

legit thread

vaxton stands up for scammers

hope he closed asap
