Hmmm , speaking of steam. I still remember the salien game back then. There are bots made for it. Those who have 35k not limited/verified accounts managed to bot them and became fucking rich bitches. God damn , I missed my chance.

I hope Valve games like CS 1.6 / CS:GO will recive some %%, because those games can make some money for me :D

Valve almost always marks their games down for the sales. If not this sale, they definitely will for the Winter sale.

The Halloween sale usually isn't anything major, I'd expect your typical horror games to get marked down: L4D, Killing Floor, Evil Within, Resident Evil, Little Nightmares, etc.

I hope Rust, I'm planning to buy it of course. But in general, I think all horror/thriller games.

Don't think there's an official date that has been leaked, but generally it starts a few days before Halloween.
