Thread: [Good Online Screen Recorder Chrome Extension?](#)

Money- - October 21, 2018, 5:02 am

I need this for my networking class. Its easier to record the screen while I'm having my practical session.

So I can refer back to what I did easier in Packet tracer. The practical and lecturer notes are shit to be honest. I rather refer to my own shit.

I was using Screencastify yesterday , but they have a recording limit of around 30 mins. Recommend me one that is able to record without any time limits.

Note: I am looking for online recorders or extensions not programs where I need to install. Its going to be hassle.

Meedman - October 21, 2018, 5:22 am

In the past I've used Loom

<https://chrome.google.com/webstore/detail/loom-video-recorder-scrree/liecbddmkiihnedobmlmillhodjkdmb>

But the best choice is to use software like Camtasia

Kind Regards,
Meedman

Camtasia is pretty bad imo.

If you want to use an actual program just use OBS.

Mr. Robot - October 21, 2018, 5:25 am

I'd suggest you just use OBS as Frankey said. Then choose window > chrome to record. Pretty simple and effective.

Yeah I forgot it :D I agree with you OBS is better ?

Strayaa - October 21, 2018, 5:27 am

Like everyone is suggesting, OBS is great for screen recording. No limits or anything, all 100% free and I think Open-Source

Adding on to Mr. Robot OBS is so much cleaner and most likely not going to hiccup in dying situations.

?

This Loom looks good. Does it have a recording time limit?

(Oct 21, 2018 05:24 AM)Frankey Wrote: [\[CITE\]](#) Camtasia is pretty bad imo.

If you want to use an actual program just use OBS.

Thanks for your recommendation.

Yeah Camtasia is quite heavy. I'll switch it OBS instead for my desktop recording activities.

Now I mainly look for lightweight recording extension to setup faster during my practical session.

No recording time limit :)

Alright Thank you! I appreciate it!

Business - October 21, 2018, 5:48 am

Nvidia desktop recorder works really well for me. Obviously, this only works with their cards. OBS is the easiest solution, as mentioned above.
