What the hell

we were supposed to have 24 episodes this season but received only 12 on top of that this is the most boring season yet. Zero amount of action. Felt a lot like filler but still enjoyed few parts of it. But this is all worth it for what happens next I guess. Can't wait for it to get animated tho. Ugh. See yall in April.

Japan the last few months has had issues with so much weather, pollution and radiation. The country is facing its hardships.
