Thread: [Crews are released!](#)

Xerotic - October 21, 2018, 8:51 pm

A couple hours ago HF was down for maintenance while we installed Crews (which was hinted by Omni a few days ago: <https://hackforums.net/showthread.php?tid=5896298>).

Now that HF is back and Crews is installed I would like to give you a quick overview of its current functionality and future plans.

With the new features you are able to create a "crew" that you are the boss of. With this crew you can invite other members and in the future there will be games, battles, and a lot of other activity centered around Crews.

When you create your crew you get to choose which tier you want. Review each option carefully as they will come with different features, durations, and rates.

Some crews allow the ability to upload a userbar. If you do this then each crew member can optionally set the crew userbar to display on their posts (only their posts as of right now).

Every Crew has a "Crew Vault". Every member is able to deposit Bytes directly into the crew vault. Only the crew boss can withdraw Bytes (the crew Boss CAN withdraw Bytes directly to any crew member wallet). The Crew Vault will come in handy in the future for games and events involving your Crew and Bytes.

Crews come with pages to view all of the members and general info regarding the crew. There is also a log page that comes in handy to track crew actions, such as vault deposits, withdrawals, invites sent, invites accepted, users leaving/joining, etc.

Another Crew Boss features is the "PM Blast". This allows the Crew Boss to send a PM to everyone in the crew at once. This will be useful to get in contact with crew members quickly.

Once a crew reaches its expiration date then it will automatically renew if enough funds are in the Crew Vault, otherwise the crew will be disbanded.

Here is a screenshot of the navigation bar of a Crew Boss:

Crews is just the very beginning of a much larger system on HF. Many crew features are planned and will be coming as quick as possible.

You can access Crews on every page "Crew CP": <https://hackforums.net/crewcp.php>

Check out the current crew tiers that you can purchase:
<https://hackforums.net/crewcp.php?action=newcrew>

See a list of current crews: <https://hackforums.net/crewcp.php?action=crews>

Thank you.

Can you upgrade a crew from Street -> Syndicate -> Cartel if the bytes bank has the difference? ie 40k or 50k ?

Nice update :) looking forward to the games part of crews!

That would be awesome feature.

Condoms - October 21, 2018, 9:05 pm

Cannot wait to see what features this develops, and when more people join it!
Something to look forward to one of these days as I get more bytes.

Octavia - October 21, 2018, 9:06 pm

This has me excited. Now I have to earn some bytes to put towards a crew.

Happeh - October 21, 2018, 9:07 pm

I want that crew userbar. Going to be hot.

Question: will these be set prices for crews or as more crews are made will their prices rise?

Also, with the bytes going back to HF through group purchase, will you do giveaways, byte days, etc. to try and pump them back out?

Nas - October 21, 2018, 9:10 pm

This is going to be a huge step for HF, I can see it.

Question: Does the userbar have to be approved or are you just able to change the text that's on the userbar.

they havent done anything with the 700k+ bytes that have been accumulated yet... so don't see why they'd recirculate them now but who knows =/

Would be pretty cool imo if you could. If you could I'd say it would be somewhat similar to usergroup rebranding except the fee would be a certain amount of bytes instead of BTC since crews are entirely byte dependent.

Uriel - October 22, 2018, 5:45 am

Is there a way to see a list of users with the most bytes? For example, you can go to the memberlist and sort it by reputation or post count, but bytes is not an option.

I'm curious how many people can currently afford/almost afford a crew.

On the stats pages, you can see the richest members down below: <https://hackforums.net/stats.php>

Though, some people have a lot of bytes on the Crypto Game, or in Crews, so you won't see them

Waiting for this thank you xero

i hope you add the way to communicate while playing games too

EDIT :10k bytes minimum to start a crew ???

I thought top will be 10k as hinted by omni but I was wrong

No place in street too

Looks like buying a crew is a dream for me

Did you plan any thing like

TIER :Landfill ?

for 500 bytes???

devnull - October 22, 2018, 8:25 am

Hackforums is definitely heading towards a nice direction with all of these new features. I feel that ever since Xerotic joined the staff team, things are being organized and stuff is getting done quicker which is a huge plus not only for us as a community, but for Omni's sake as well. I know how hard it

is running stuff by yourself and by having more people to the team who are trustworthy and knowledgeable, great things can be achieved. Thanks for adding this feature! it looks amazing.

Omniscient - October 22, 2018, 8:42 am

In the Crew control panel there are options to change the name and image. However, there is currently a 500 Byte fee to do so. That's to prevent constant rebranding. We might take some screenshots for you guys.

I know you think Crews are expensive but consider this. You earn Bytes freely. You don't have to pay for them. You can win them gambling or even get some from the crypto game.

Soon we'll be adding a bonus for Byte earnings for upgraded members. That will help too.

Members should be able to pool their Bytes to buy a Crew.

Don't worry, just because there isn't instantly 10 Crews on HF doesn't mean that in a year there might not be 50 of them. This is a LONG TERM project for HF.

I'm willing to convert any group into a Cartel Crew. You should know that Groups get private forums and Crews do not though.

I don't want to devalue groups but we have too many and if 5-8 can be converted into Crews I think that would be a good thing. I'm hoping over time as Crews grow that group owners take me up on the offer.

Might of been asked but will crews get a custom chat or sub forum they can discuss things privately in as a crew?

Crews will not get their own subforums. However when we implement real-time chat I imagine that we will create Crew chats.

Nope they don't.

You can mass message though.

Currently the boss has a "PM All" tool. Once IM is integrated into HF then they can use that. As for

a subforum... almost certainly not.

I read the PM all tool but that's a tad janky to get the users in the crew to talk to each other. I take it only the boss can send out the mass PMs as well.

Looking forward to seeing some of the games/wars that come out of this. It is a really neat feature to have. Fun and keeps the forum active and busy.

Good work, boys. This is for sure one of the better updates thus far.

Call me a gravedigging hillbilly ass licking hobnoger, but god damn god damn over 2 long weeks of anxiously awaiting CREW WARS.

I can only talk so much shit before I stop sounding bad ass and start sounding like an insecure bitch boy with low self esteem and pussyidis!

That being said... @goons, @infamous, @kawenscrewof2, eat shit! The exact SECOND crew vs crew games get released, you're all getting temp banned and renamed to "Gucci Slave #". Mark my words mofos. Especially you @infamous, haven't even started up a crew. Ridiculous

Excited about the latest addition buddy.
Anyways, is it possible to check out the memberlist of any Crew?

I will be including this soon. The crew profile page will be enhanced to be very more informative.
Imagine the member list of each crew in cards like this on the crew profile page:
<https://hackforums.net/memberlist.php>

Yeah my mom taught me not to pick fights I'm not 100% certain I can win. So I'll stay clear from them, as for the rest of my crew tho idk, majority rules and if they vote to attack then so be it. I'll die fighting.

Wow, that sounds like a great addition to the crews. So, are you planning to keep it normal like the memberlist or similar to real card decks where you can rank your members like King, Jack , Ace etc ?

So what will happen to the HF Group?

It's interesting to see that.

Groups will have their own sub-forum where they can discuss things privately which Crews lack.

Crews are more sort of fun activity I guess.

Theres something called a group chat :p

Only plus to subforums is the ability to inflate ones post count lol but yeah crews should be fun

Crew Profiles will now have their members listed in the style of the normal memberlist.

Example: <https://hackforums.net/crewcp.php?action=profile&id=3>

If you see some odd visuals then you need fresh CSS:

<https://hackforums.net/cache/themes/theme12/crews.css>

My crew members aren't able to deposit bytes into the vault is what they're saying. Hoping this can be solved soon, thanks.

Edit: Nevermind, Narrate is just an idiot and you go here:

<https://hackforums.net/crewcp.php?action=members>

Maybe adding an option in the sidebar may be a little easier to find?

The way I designed it was so that if you were on any private Crew page (as a member or the boss) then you will see the "Deposit Bytes" button.

These pages:

However I do agree that perhaps removing the button and instead adding it under the "Set/Remove as Display Group" link might make it easier to spot where to add to the Crew Vault.
